

**Minnesota Pollution  
Control Agency**

# **Detailed Assessment** *of*

# **Phosphorus Sources** *to* **Minnesota Watersheds**

**Volume 1: Executive Summary and Report**

*Prepared by Barr Engineering Company  
February 2004*

*Detailed Assessment of Phosphorus Sources to  
Minnesota Watersheds*

*Under TMDL Master Contract*

*Prepared for  
Minnesota Pollution Control Agency*

*Submitted by  
Barr Engineering Company*

*February 2004*

*Project Funding/Costs*

*Funding for this project was recommended by the Legislative Commission on Minnesota Resources (LCMR) from the Environmental Trust Fund. The total cost of this report was \$400,700, of which \$244,000 was provided by the Environmental Trust Fund.*

The Detailed Assessment of Phosphorus Sources to Minnesota Watersheds was prepared by Barr Engineering Company, with its partners Limno-Tech, Inc., Dr. David Mulla, and Dr. Prasanna Gowda, under the Total Maximum Daily Load (TMDL) Master Contract for the Minnesota Pollution Control Agency. Funding for this project was recommended by the Legislative Commission on Minnesota Resources (LCMR) from the Environmental Trust Fund. The total cost of this report was \$400,700, of which \$244,000 was provided by the Environmental Trust Fund.

## **Barr Engineering Team**

*Project Principal:* Henry (Hal) Runke

*Project Manager:* Greg Wilson

*Technical Writers:* Barr Engineering Company—Teresa Perry, Nick Nelson, Jeff Lee, Tim Anderson, Cliff Twaroski, Pat Hirl, Jamie Bankston, Ron Reding, Keith Pilgrim, Greg Wilson; Limno-Tech, Inc.—Hans Holmberg, Joe DePinto, Jagjit Kaur, Dave Dilks; University of Minnesota, Department of Soil, Water, and Climate—David Mulla, Prasanna Gowda

*Data Collection/Analysis:* Dan Nesler, Scott Sobiech, Sheryl Filby, Christy Hendrikson, Janna Kieffer, Mary Finch, Dave Melmer, Michael Perry

*Project Administration:* Charles Hathaway, Ruth Lovsted

*Design, Editing, Report Production:* Yvonne Huffman, Karen Kaul, Suzanne Johnson, Anita Dickson, Tanya Roberts

# Detailed Assessment of Phosphorus Sources to Minnesota Watersheds

## Volume I—Table of Contents

Acknowledgements .....	i
Executive Summary.....	ii
Background—The Problem with Phosphorus.....	ii
Purpose of Assessment.....	ii
Methods Used.....	vi
Categories of Findings .....	viii
Phosphorus Source Category Loadings Statewide .....	viii
Phosphorus Source Category Loadings by Major Basin .....	x
Statewide Phosphorus Source Category Loadings by Flow Condition .....	xiii
Low Flow Conditions.....	xiii
Average Flow Conditions.....	xvii
High Flow Conditions .....	xvii
Major Basin Phosphorus Source Category Loadings by Flow Condition .....	xvii
Concepts for Lowering Phosphorus Export from Point Sources.....	xxi
Lowering Phosphorus Loading Discharged to POTWs.....	xxi
Overall Recommendation for Lowering Phosphorus Loads to POTWs.....	xxiii
Lowering Phosphorus Loads to Surface Waters.....	xxiv
Current Effluent Phosphorus Reduction Efforts by Wastewater Treatment Plants .....	xxv
Concepts for Lowering Phosphorus Export from Nonpoint Sources .....	xxvii
Agricultural Runoff .....	xxvii
Atmospheric Deposition .....	xxviii
Deicers .....	xxviii
Streambank Erosion.....	xxviii
ISTS/Unsewered Communities .....	xxix
Non-Agricultural Rural Runoff .....	xxix
Urban Runoff.....	xxx
Relative Phosphorus Source Loading Uncertainty/Recommended Refinements.....	xxx
Overall Conclusions.....	xxx
1.0 Introduction .....	1
1.1 Background.....	1
1.2 Legislative Mandate to Conduct this Study .....	2
1.3 Organization of this Report.....	4
1.4 Frame of Reference for Quantifying Phosphorus Source Contributions to Surface Waters .....	4
1.4.1 Surface Waters Defined.....	5
1.4.2 Context for Quantifying Phosphorus Source Contributions .....	7
2.0 Methods.....	8
2.1 Basin Hydrology .....	8
2.1.1 Minnesota Basins.....	8

2.1.2	Calculation of Basin Runoff Volumes.....	8
2.1.2.1	River Discharge Data .....	10
2.1.2.2	Precipitation Data .....	10
2.1.2.3	Runoff Frequency Curves.....	11
2.1.2.4	Precipitation Frequency Curves.....	12
2.1.2.5	Runoff Maps .....	12
2.2	Phosphorus Sources to POTWs and Minnesota Surface Waters.....	12
2.2.1	Point Sources of Phosphorus .....	13
2.2.1.1	Data Sources for Wastewater Treatment Facilities.....	14
2.2.1.2	Approach for Determining Phosphorus Discharged to POTWs .....	17
2.2.1.3	Approach for Determining Phosphorus Loading to Surface Waters .....	21
2.2.2	Nonpoint Sources of Phosphorus.....	23
2.2.2.1	Agricultural Runoff .....	24
2.2.2.1.1	Cropland and Pasture .....	24
2.2.2.1.2	Feedlot Runoff .....	36
2.2.2.2	Atmospheric Deposition .....	37
2.2.2.2.1	Dry Deposition .....	38
2.2.2.2.2	Wet Deposition.....	41
2.2.2.3	Deicing Agents .....	42
2.2.2.4	Streambank Erosion.....	45
2.2.2.5	Individual Sewage Treatment Systems/Unsewered Communities .....	47
2.2.2.6	Non-Agricultural Rural Runoff .....	51
2.2.2.7	Urban Runoff.....	57
2.2.3	Bioavailability of Phosphorus by Source.....	61
2.2.3.1	Forms of Phosphorus in the Aquatic Environment.....	62
2.2.3.2	Bioavailable Phosphorus in POTW Effluent .....	63
2.2.3.3	Bioavailable Phosphorus in Runoff.....	65
2.2.3.4	Bioavailable Phosphorus in Agricultural Runoff.....	66
2.2.3.5	Bioavailable Phosphorus in Atmospheric Deposition .....	68
2.2.3.6	Comparison of Phosphorus Bioavailability from Different Sources .....	69
2.2.3.7	Summary of Literature Review .....	70
2.2.4	Assessment of Effluent Total Phosphorus Reduction Efforts by POTWs .....	74
3.0	Results and Discussion .....	76
3.1	Basin Hydrology .....	76
3.1.1	Frequency Curves.....	76
3.1.2	Runoff Maps .....	76
3.2	Estimated Basin Total Phosphorus Amounts Contributed to POTWs and Surface Waters (by Source) .....	81
3.2.1	Point Sources .....	81
3.2.1.1	Sources and Amounts of Phosphorus Discharged to POTWs .....	81
3.2.1.2	Phosphorus Loading to Surface Waters.....	87
3.2.2	Agricultural Runoff .....	93
3.2.2.1	Cropland and Pasture Runoff .....	93
3.2.2.2	Feedlot Runoff.....	103
3.2.3	Atmospheric Deposition .....	105

3.2.4	Deicing Agents .....	107
3.2.5	Streambank Erosion.....	108
3.2.6	Individual Sewage Treatment Systems/Unsewered Communities .....	110
3.2.7	Non-Agricultural Rural Runoff .....	113
3.2.8	Urban Runoff.....	115
3.3	Summary of Phosphorus Loadings by Basin .....	117
3.3.1	Phosphorus Loadings by Source Category .....	117
3.3.2	Phosphorus Source Category Loadings by Flow Condition .....	121
3.4	Phosphorus Sources and Estimated Amounts Contributed to Surface Waters (by Basin, Total and Bioavailable).....	125
3.4.1	Statewide Inventory .....	125
3.4.1.1	Dry Conditions (Low Flow) .....	125
3.4.1.2	Average Condition.....	128
3.4.1.3	Wet Condition (High Flow).....	131
3.4.2	St. Croix River Basin.....	134
3.4.2.1	Dry Conditions (Low Flow) .....	134
3.4.2.2	Average Condition.....	137
3.4.2.3	Wet Condition (High Flow).....	137
3.4.3	Upper Mississippi River Basin .....	141
3.4.3.1	Dry Conditions (Low Flow) .....	141
3.4.3.2	Average Condition.....	145
3.4.3.3	Wet Condition (High Flow).....	148
3.4.4	Lower Mississippi River Basin.....	151
3.4.4.1	Dry Conditions (Low Flow) .....	151
3.4.4.2	Average Condition.....	151
3.4.4.3	Wet Condition (High Flow).....	155
3.4.5	Red River Basin.....	159
3.4.5.1	Dry Conditions (Low Flow) .....	159
3.4.5.2	Average Condition.....	159
3.4.5.3	Wet Condition (High Flow).....	163
3.4.6	Rainy River Basin.....	167
3.4.6.1	Dry Conditions (Low Flow) .....	167
3.4.6.2	Average Condition.....	167
3.4.6.3	Wet Condition (High Flow).....	171
3.4.7	Lake Superior Basin .....	175
3.4.7.1	Dry Conditions (Low Flow) .....	175
3.4.7.2	Average Condition.....	175
3.4.7.3	Wet Condition (High Flow).....	179
3.4.8	Missouri River Basin .....	183
3.4.8.1	Dry Conditions (Low Flow) .....	183
3.4.8.2	Average Condition.....	183
3.4.8.3	Wet Condition (High Flow).....	187
3.4.9	Minnesota River Basin .....	191

3.4.9.1	Dry Conditions (Low Flow) .....	191
3.4.9.2	Average Condition.....	191
3.4.9.3	Wet Condition (High Flow).....	195
3.4.10	Cedar River Basin.....	199
3.4.10.1	Dry Conditions (Low Flow) .....	199
3.4.10.2	Average Condition.....	199
3.4.10.3	Wet Condition (High Flow).....	203
3.4.11	Des Moines River Basin .....	207
3.4.11.1	Dry Conditions (Low Flow) .....	207
3.4.11.2	Average Condition.....	207
3.4.11.3	Wet Condition (High Flow).....	211
3.5	Comparison of Total Phosphorus Loadings from All Sources With Monitored Loadings in Minnesota and Upper Mississippi River Basins .....	215
3.6	Effluent Total Phosphorus Reduction Efforts by Wastewater Treatment Plants .....	217
4.0	Recommendations .....	224
4.1	Recommendations for Lowering Phosphorus and Associated Water Quality Benefits .....	224
4.1.1	Point Sources .....	224
4.1.1.1	Phosphorus Loading to POTWs .....	224
4.1.1.2	Phosphorus Loading to Surface Waters.....	227
4.1.2	Cropland and Pasture Runoff.....	227
4.1.3	Atmospheric Deposition .....	229
4.1.4	Deicing Agents .....	229
4.1.5	Streambank Erosion.....	229
4.1.6	Individual Sewage Treatment Systems/Unsewered Communities .....	230
4.1.7	Non-Agricultural Rural Runoff .....	231
4.1.8	Urban Runoff.....	231
4.2	Recommendations for Reducing Uncertainty and Error Terms in Future Refinements .....	232
4.2.1	Point Sources .....	233
4.2.2	Agricultural Runoff .....	236
4.2.2.1	Cropland and Pasture Runoff .....	236
4.2.2.2	Feedlot Runoff.....	238
4.2.3	Atmospheric Deposition .....	241
4.2.4	Deicing Agents .....	241
4.2.5	Streambank Erosion.....	242
4.2.6	Individual Sewage Treatment Systems/Unsewered Communities .....	244
4.2.7	Non-Agricultural Rural Runoff .....	245
4.2.8	Urban Runoff.....	246
5.0	Overall Conclusions .....	248
References	.....	251

## List of Tables

Table EX-1	Statewide phosphorus contributions of point and nonpoint sources by flow condition .....	xiv
Table EX-2	Major Source Category Contributions of Total and Bioavailable Phosphorus to Each Basin and the State, by Flow Condition.....	xx
Table EX-3	Reduction Potential for Phosphorus Loads to POTW .....	xxiv
Table 1-1	Minnesota River Point and Nonpoint Source Load Contributions at Various Flow Duration Intervals.....	2
Table 2-1	Basin Characteristics.....	10
Table 2-2	Estimated Bioavailable Phosphorus (BAP) Fractions of Samples Collected from the Final Effluent of Eight Minnesota POTWs.....	65
Table 2-3	Relative Bioavailability of Particulate Phosphorus from Various Sources to the Lower Great Lakes .....	70
Table 2-4	Proportion of Bioavailable Phosphorus in Total Phosphorus by Different sources .....	70
Table 2-5	Estimates of Bioavailable Phosphorus Fractions for Specific Source Categories.....	72
Table 3-1	Basinwide Runoff and Precipitation .....	80
Table 3-2	Total Phosphorus Load Discharged to POTWs .....	81
Table 3-3	Estimated Statewide Phosphorus Loadings to POTWs .....	85
Table 3-4	Estimated Statewide Phosphorus Loadings to Private WWTP .....	85
Table 3-5	Non-Ingested Phosphorus Loadings to POTWs.....	88
Table 3-6	Total Point Source Phosphorus Loads to Surface Waters for Each Basin and the State .....	89
Table 3-7	Point Source Phosphorus Loads by Facility Type .....	90
Table 3-8	Phosphorus Removal in POTWs and Privately Owned Treatment Facilities .....	91
Table 3-9	Phosphorus Loadings (kg/yr) to Minnesota Surface Waters from Agricultural Cropland by Major Drainage Basin Based on an Analysis of Phosphorus Index Values in Major Watersheds .....	100
Table 3-10	Estimated Annual Phosphorus Loadings for Outdoor Open Lot Feedlot Runoff to Surface Waters	104
Table 3-11	Estimated Total Phosphorus Deposition to Minnesota Basins.....	106
Table 3-12	Major Basin and Statewide Total Phosphorus Loadings from Deicers for Each Snowfall Scenario	107
Table 3-13	Summary of Total Phosphorus Loading Estimates (kg/yr) for Streambank Erosion.....	109
Table 3-14	Summary of Estimated Total Phosphorus Yield (kg/km <sup>2</sup> /yr) from Streambank Erosion for Average Flow Conditions.....	109
Table 3-15	Estimated Annual Phosphorus Loadings for ISTS and Unsewered Communities .....	112
Table 3-16	Estimated Annual Phosphorus Loadings for Non-Agricultural Rural Land Cover Types.....	114
Table 3-17	Estimated Annual Phosphorus Loadings for Incorporated Urban Areas .....	116
Table 3-18	Statewide phosphorus contributions of point and nonpoint sources by flow condition .....	122
Table 3-19	Major Source Category Contributions of Total and Bioavailable Phosphorus to Each Basin and the State, by Flow Condition.....	124
Table 3-20	Wastewater Treatment Plant Phosphorus Removal Summary .....	223
Table 4-1	Reduction Potential for Phosphorus Loads to POTW .....	226
