## **FACILITY DESCRIPTION:**

### **Permit Action 001 (Total Facility Permit):**

The Permittee operates an interstate transportation pipeline station. The facility is unmanned. The existing facility has one product storage tank. The station is equipped with two dual-fuel diesel units and operates 24 hours per day, 365 days per year. The main source of air emissions are combustion products, mainly NO<sub>x</sub> and CO. The facility also operates a soil remediation system which is a source of VOC and HAP emissions.

The facility has potential NO<sub>x</sub> emissions which exceed 100 tons per year. They are not one of the 28 listed source categories for NSR. They are considered a major source under 40 CFR Part 70.

### **Permit Action 002 (Administrative Amendment):**

This permit action is for a change of name at the facility. The name of the facility is now Magellan Pipeline Company, L.P. (previously Williams Pipe Line Company).

Certain exclusions apply and are listed in Minn. R. 7007.1250, subp. 2. In addition, this permit specifically prohibits the Permittee from making any modifications that would make the source major under NSR. The following table is a listing of the insignificant activities that the Permittee is somewhat likely to add and their associated applicable requirements.
