

Studies with Wasteload Allocations for

Total Maximum Daily Load (TMDL) studies underway where one or more Municipal Separate Storm Sewer Systems (MS4) will likely receive a Waste Load Allocation.

The MS4s will not be identified until the TMDL study is further along.

NAME	TMDL ID	TMDL Project Name
Not determined yet	10233	Bluff Creek - Turbidity & Impaired Biota (Metro)
Not determined yet for some lakes	10039	Carver County Watershed TMDL (Metro)
Not determined yet	10442	Cottonwood River Watershed - Turbidity
Not determined yet	10064	Credit River - Turbidity (Metro)
Not determined yet	10069	Crow River Watershed - Mainstem & Lower North Fork - Conventional Pollutants
Not determined yet	10369	French River - Turbidity
Not determined yet	10146	Lester River (North Shore Streams Group)
Not determined yet	10101	Lino Lakes Chain TMDL (Metro)
Not determined yet	10196	Nemadji River - Turbidity
Not determined yet	10222	Red River Basin Turbidity TMDL Project
Not determined yet	10227	Redwood River Watershed - Turbidity
Not determined yet	10243	Sand Creek, Minnesota River Basin - Turbidity & Impaired Biota (Metro)
Not determined yet	10278	Talmadge River (North Shore Streams Group)
