

Industrial Stormwater Multi-Sector NPDES/SDS Permit Application Instructions

For coverage under individual NPDES/SDS permits

The National Pollutant Discharge Elimination System (NPDES)/State Disposal System (SDS) Permit Program regulates industrial stormwater (ISW) discharges to surface waters and land. Municipal and privately owned facilities which have Narrative Activities or a Primary Standard Industrial Classification (SIC) code listed in these instructions must obtain permit coverage for their ISW activities. Affected permittees have two options: 1) request permit coverage under the Industrial Stormwater Multi-Sector General Permit or 2) permittees that are also required to hold an individual NPDES/SDS permit may request to incorporate its industrial stormwater permit requirements into its NPDES/SDS permit so all permit requirements are in one permit.

Permittees requesting incorporation of their ISW permit requirements into their individual NPDES/SDS permit must fill out this application. This process will also help identify facilities that qualify for No Exposure exclusion.

What is stormwater?

Stormwater includes precipitation runoff, stormwater runoff, snowmelt runoff, and surface runoff and drainage. *It is not industrial process wastewater.*

What are the benefits of incorporating ISW permit requirements into my NPDES/SDS permit?

In addition to the fact that you will only have one NPDES/SDS rather than two, there are less permit fees associated. The application fee for the ISW Multi-Sector General Permit is \$400. The annual permit fee is \$400. There are no additional application or annual fees for incorporating the ISW permit requirements into your NPDES/SDS permit above and beyond the normal application and annual fees for an NPDES/SDS permit. Therefore the permittee can save \$2,400 in fees. For more information on permit fees, go to the MPCA website at <http://www.pca.state.mn.us/index.php/view-document.html?gid=6987>. Your benchmark sampling frequency may be different between the two permits and therefore there may be additional costs associated with sampling however the frequency will be no more than quarterly under an individual permit.

What is the No Exposure exclusion?

Facilities which can demonstrate facility product and material management that prevents stormwater contact and contamination may qualify for five-year conditional permit exclusion. Once qualified, facilities are exempt from the annual fee, reports and monitoring requirements.

Do I need permit coverage for each location if I operate multiple facilities?

Yes. You are required to obtain permit coverage, this includes certifying a condition of No Exposure, for each separate facility with a listed narrative activity or Primary SIC code. One facility means land that shares a common border and that has a stormwater discharge associated with industrial activity as defined by 40 CFR § 122.26(b)(14) with the discharge having a common owner/operator.

What if I have mobile industrial activities that need a NPDES/SDS stormwater permit? Do I have to submit an application for each location of the mobile activities?

No. If a facility's "parent" company is required to obtain permit coverage, the mobile operations are covered under the parent facility's permit coverage.

It is required to create a section within the Stormwater Pollution Prevention Plan (SWPPP) for each of these activities and kept on-site where the activity is occurring. See the next question for more information about SWPPPs.

If a facility's mobile industrial activities are defined by SIC codes 1411, 1422, 1423, 1429, 1442, and/or 2951 you may receive stormwater permit authorization under permit MNG490000. MNG490000 does not require separate authorization for every location of mobile operations. If you wish to receive authorization under MNG490000, contact the Permit Administrative lead at 651-296-6300 or 800-657-3864 (in Minnesota only). Visit the website <http://www.pca.state.mn.us/index.php/water/water-permits-and-rules/water-permits-and-forms/nonmetallic-mining-and-associated-activities.html> for forms guidance.

Do municipalities, universities, military facilities, etc., have to apply as facilities that engage in Narrative Activities or SIC codes indicated in these instructions?

Yes. All municipally owned or operated industrial facilities are required to obtain permit coverage if they have an industrial activity as defined by 40 CFR 122.26 with a narrative description. If a narrative activity is located within the municipality's facility boundary, all other regulated industrial activities occurring at the within the facility boundary must be included within the application and described in the facility SWPPP. If within the facility boundary the activities are classified by primary SIC code 9199, all secondary SIC codes will not require permit coverage. If the municipality has an industrial activity which is separate from the municipality, generates its own revenue, and is primary at that location, the facility will need permit coverage. Military facilities, if having industrial activities pursuant to 40 CFR 122.26, will need permit coverage for any narrative activity or SIC code, regardless of whether classified by primary SIC code 9711.

Instructions for completing the permit application.

This section does not provide additional guidance on each question. Only questions where additional information may be beneficial.

Question 2: Select all applicable Narrative Activities from the list provided below.

Refer to the *Narrative Activities and Standard Industrial Classification (SIC) codes* Section of these instructions for assistance in making your determination.

Question 3: What are your facilities primary SIC code?

If your facility is primarily engaged in any of the activities for the SIC codes listed, write down that four-digit SIC code in the space provided. To search by keywords or to find detailed information about a specific SIC Code, visit: <https://www.osha.gov/pls/imis/sicsearch.html>.

Primary SIC Code is the SIC code associated with the industrial activity that generates the greatest revenue. If revenue data is not available, the owner/operator shall base the determination on the number of employees engaged in the industrial activity. If it is not possible to determine the primary SIC code using either of these two methods, the owner/operator shall base the determination on the SIC code with the greatest production. The industrial activity that generates the greatest revenue, employs the most personnel, or has the greatest production, is the industrial activity assigned the primary SIC code.

Question 4: List up to five additional authorized SIC codes from the instructions, if applicable.

If you listed a Primary SIC code in 3, look at all of the SIC codes provided below in the *Narrative Activities and SIC codes* Section to see if any additional SIC codes are applicable at each facility. These SIC codes are considered “co-located” activities and are regulated by the Permit. List up to five additional applicable SIC codes.

Question 5: If you listed SIC codes 2869, 4512, 4513, 4522, or 4581 in 3 or 4, list the corresponding subsector.

These five SIC codes fall within more than one subsector. If the facility listed any of these SIC codes within 3 or 4, list the subsector that correlates with that SIC code. For example: SIC Code 2869 - C7 or SIC code 4581 - S2.

Question 6: What is the total acreage of your industrial activities at your facility?

a	Total acres of facility
b	Total acreage of office buildings and parking lots, where no industrial activities are occurring
c	Total acreage of landscaped/natural acreage of areas where no industrial activities are occurring
d	Total acres of industrial activities (a-b-c=d)

Question 8: No Exposure. Does the entire facility qualify for No Exposure?

Enter “yes” or “no” to the following questions:

- A. Using, storing or cleaning industrial machinery or equipment, and areas where residuals from using, storing or cleaning industrial machinery or equipment remain and are exposed to stormwater.
Example: equipment or vehicle wash areas
- B. Materials or residuals on the ground or in stormwater inlets from spills or leaks.
Example: vehicles needing repair, areas of hydraulic fluid/fuel spillage
- C. Materials or products from past industrial activity
Example: a new owner takes over a facility and the previous owner had industrial materials/products stored or managed outside
- D. Material handling equipment (except adequately maintained vehicles).
Example: leaking forklifts, trolleys, automated machinery

- E. Materials or products during loading or unloading or transporting activities.
Example: totes, drums, raw materials needed for process (with the potential to have a release into stormwater), uncovered fueling activities
- F. Materials or products stored outdoors (except final products intended for outside use, where exposure to stormwater does not result in the discharge of pollutants).
Example: broken or contaminated pallets, salt, coal
- G. Materials contained in open, deteriorated or leaking storage drums, barrels, tanks and similar containers.
Example: raw materials or intermediate products materials from process
- H. Materials or products handled or stored on roads or railways owned or maintained by the discharger.
Example: stockpiles of materials, land applied by-product
- I. Waste materials (except waste in covered, non-leaking containers like a covered dumpster).
Example: oily rags, sawdust, spent equipment, containers of used oil
- J. Application or disposal of process wastewater (unless otherwise permitted) (If currently unpermitted, you must have an NPDES/SDS permit or authorization from your local wastewater treatment facility to continue this activity).
Example: land application
- K. Particulate matter or visible deposits of residuals from roof stacks and/or vents not otherwise regulated (i.e. under an Air Quality Permit) and evident in the stormwater outflow.
Example: bag-house dust, smokestack residue, where the materials have fallen on the ground

If you answered “no” to all 11 questions, you can certify a condition of No Exposure. Continue to 9. If you answered “yes” to any of these 11 questions, you do not qualify for No Exposure. Skip 9 and continue to 10.

Answer these additional questions if you were unable to certify for No Exposure

Question 10: Do your stormwater discharges flow to a regulated Municipal Separate Storm Sewer System?

A facility that has a stormwater discharge associated with industrial activity and directly discharges into any regulated Municipal Separate Storm Sewer System (MS4), list that regulated MS4. Also, you must notify the operator of the MS4 that receives this discharge of the existence of this industrial stormwater permit authorization. Not sure if your facility’s discharge flows to a regulated MS4 collection system? Visit the MS4 web page for more information about whether or not you discharge to a regulated MS4 collection system: <https://www.pca.state.mn.us/water/stormwater/stormwater-ms4.html> and click on these links:

- <https://www.pca.state.mn.us/publications/wq-strm4-76.pdf>
- <https://www.pca.state.mn.us/publications/wq-strm4-75.pdf>

Question 12: Monitoring location information

List all Benchmark and Effluent Monitoring Locations. **A minimum of one monitoring location is required.** Benchmark Monitoring Locations should be located below the most down-gradient BMP from the source of industrial activity or significant material, but prior to discharging stormwater from the Permittee's operational control. Indicate the following:

- description of the monitoring location (such as the northwest corner of the facility, near the road/driveway)
- latitude/longitude of each monitoring location
- subsector letter/number of Narrative Activities (such as O2) or the four-digit SIC code(s) associated with this monitoring location

Attach additional sheets as necessary.

Note: No monitoring location can contain more than one activity that has effluent monitoring requirements. Also, if your facility is choosing to have "representative monitoring" for either multiple monitoring locations or multiple industrial activities whose stormwater is co-mingling, list out only the monitoring locations where sampling is occurring, and provide all SIC codes and/or Narrative Activities for those locations.

Narrative Activities and SIC

Federal regulations require facilities with Narrative Activities and/or Primary SIC codes that fall under any of the eleven categories of industrial activity, defined at 40 CFR 122.26 (b)(14)(i)-(xi), except category (x), to obtain authorization to discharge industrial stormwater or to certify a condition of No Exposure. Therefore, the facilities classified with the following Narrative Activities and/or SIC codes are required to obtain an NPDES/SDS permit or certify for No Exposure.
