Notes:

1. As a reference, proposed HRLs for these compounds are: PFOS – 0.30 ppb; PFOA – 0.50 ppb; PFBA – 1.00 ppb (currently a guideline).
2. (high - low): References highest concentration detected in a sample from a site and the lowest concentration detected.
3. ND: The parameter was not detected.
4. MSW: Municipal solid waste
5. spray leachate: Leachate that has been pre-treated prior to spray irrigating on site.
