On the training date, presenters will supply you with current information & your final test.

Presenters

Jeff Brandon of the Minnesota Pollution Control agency will provide for us the latest rule/regulation changes & updates. Jeff will emphasis what MNPCA has been working and what has not been approved at tank sites.

Steve Reckinger of Holiday Stationstores, Inc. has been a part of the Underground Storage Tank Certification/recertification program since 1990. Steve is a very knowledgeable industry professional with real world experience.

John Drees has been working with the Underground Storage Tank Program since 2005. John has more than 25 years of experience teaching hour based and credit based courses for Riverland Community College in Industrial Safety and Industrial Technology. John has a certificate in Cathodic Protection to API standards.

This course also includes guest instructors who have many years of practical field experience and expertise with underground storage tanks.

MINNESOTA STORAGE TANK SERVICE PROVIDER

Course Overview

This course satisfies requirements for recertification of Underground Storage Tank Certified Supervisors. This training consists of course review, regulatory overview and updates pertinent to storage tank service providers of all disciplines. Concurrent seminars pertinent to either the discipline of tank removal or tank installation and repair will be provided.

Training topics include:

- MPCA Overview
- Cathodic Protection
- Regulatory Updates
- Removal Updates
- Tank Safety Removal, Cleaning, Transportation, Disposal
- Installation and Maintenance Updates
- Tank Removal Safety
- Tank Installation and Repair Safety

Course Focus

This course is intended for storage tank service providers who are seeking recertification as certified supervisors for the removal, installation, and repair of underground liquid storage systems, as required by Minnesota State Law. The course is also for individuals who wish to gain more information about underground storage systems.
