Section 1: Introduction	..1
Section 2: Monitoring purpose, data uses and goals	..9
Section 3: Data quality	..13
Section 4: Design your monitoring effort	..23
Section 5: Data management	..47
Section 6: Converting data to information	..53
Section 7: Evaluating monitoring program performance	..77
References	..83
Appendix A: Resources	..A1
Appendix B: Considerations for selecting and using a contract laboratory	..B1
Appendix C: Summary matrix of existing manuals	..C1
Appendix D: Monitoring requirements for MPCA 305(b) and 303(d) assessments	..D1
Appendix E: Equipment and supply vendors	..E1
Appendix F: MPCA Water Quality Database meta-data descriptions and requirements	..F1
Appendix G: Useful tools for monitoring	..G1
Appendix H: Examples of local data use	..H1
Appendix I: Acronyms, abbreviations and symbols	..I1
Appendix J: Glossary	..J1

Icons

Throughout the guide, you will see boxes with an icon at the top indicating the type of information that is in the box. The icon is meant to help you decide if you want to read the supplementary information included in the boxed text.

More Information: Adds information to make text more understandable, or to add an interesting note to the text.

Link: Indicates a link to more information that is available on the Internet.

Technical: When you see this icon, you will find information that is more technical than the text as a whole. More advanced technical readers may be interested in this information as well as non-technical readers who want to learn more.

Example: Indicates a story of volunteers in action doing water monitoring activities; often shows how they have obtained results using various methods or processes.
