

There are two proposals relating to reclassification of Class 7 Limited Resource Value waters during the 2008-2011 Minn. R. ch. 7050 rulemaking proceeding: 1) possible addition of new Class 7 waters to the rule in response to outside party request; and 2) a triennial review of all Class 7 waters currently listed in Minn. R. ch. 7050.

For the most part, Class 7 waters are low-flow streams and ditches that are protected so as to allow secondary body contact, to preserve the groundwater for use as a potable water supply, and to protect the aesthetic qualities of the water. Use attainability analyses (UAAs) are conducted on candidate Class 7 waters to determine whether or not the Clean Water Act “fishable and swimmable” goals under Class 2 standards are achievable. If the UAA reveals that the aquatic life and recreational uses in and on Class 7 waters are limited, the water is proposed for reclassification during the triennial review. As part of the multiple use classification system for waters of the state, Class 7 waters are also protected for industrial consumption (Class 3C), agriculture and livestock uses (Class 4A and 4B), aesthetic enjoyment and navigation (Class 5) and other uses (Class 6).

The Minnesota Pollution Control Agency (MPCA), is conducting a review of all listed Class 7 Limited Resource Value waters in accordance with the provisions of 40 CFR § 131.20 (a) which in part states: *Any water body segment with water quality standards that do not include the uses specified in section 101 (a) (2) of the Act shall be re-examined every three years to determine if any new information has become available.* Opinions and comments are being sought from the public on the continued assignment of the Class 7 use classification for these waters. MPCA staff acknowledges that the physical conditions that were cited originally when these waters were individually assessed (e.g. degree of channelization and lack of sustaining flows) probably have not changed much over time. The MPCA is, nonetheless, requesting the public’s consideration regarding the continued assignment of this use classification to these waters. Specifically the MPCA is requesting:

1. Information on any known and observed “fishable and swimmable” related uses of existing Class 7 water segments.
2. Information on any past, current, or future habitat restoration activities within channelized segments of Class 7 waters where the watercourse is purposely allowed to revert to a more natural waterway.
3. Information on any past, current, or future channel maintenance (re-dredging) activities on existing Class 7 waters.

The following is a list of waters currently classified as Class 7 Limited Resource Value waters in Minn. R. 7050.0470. For ease of reference, refer to the accompanying watershed map (Minn. R. 7050.0466) which shows the watershed basins and the counties, or portions of the counties, within these major river basin boundaries. The names following the list Class 7 water provide additional location information for the waterbody.
