

## Special Waters List

January 2004

wq-strm #1-05

Disclaimer: This table is a combination of information from the Minnesota Pollution Control Agency (MPCA) and Department of Natural Resources. In some cases, it contains multiple entries for a single water body. The MPCA is attempting to provide information needed to comply with the construction storm water permit, but has not yet had a chance to thoroughly review the content of this table for accuracy and completeness. That review is currently under way, and the MPCA will replace this table with a more complete table at a later date. In the meantime, this table can assist permittees in identifying special waters, but you may also need to review Minn. R. 7050.0470 and Minn. R. 6262.0050 until the MPCA is able to post the updated list on this Web site.
