

# Upper Mississippi River – Lake Pepin Water Quality Model Development, Calibration, and Application

---

Prepared for:  
Minnesota Pollution Control Agency

July 2009

## TABLE OF CONTENTS

1. Introduction.....	1
1.1 Background and Project Objectives.....	1
1.2 Problem Specification.....	3
1.2.1 Management Objectives.....	3
1.2.2 System Characteristics.....	5
1.2.3 Programmatic Constraints.....	5
1.3 Project Approach.....	6
1.3.1 Problem Specification.....	8
1.3.2 Model Framework Selection.....	8
1.3.3 Model Development.....	8
1.3.4 Model Calibration and Confirmation/Evaluation.....	9
1.3.5 Model Application.....	10
2. UMR-LP Model Development.....	11
2.1 Model Selection.....	11
2.1.1 Review of HQI Upper Mississippi River Model.....	11
2.1.2 Comparison of UMR Model to Public-Domain Codes.....	12
2.1.3 Selected Approach.....	13
2.2 Overview of Model Framework.....	13
2.3 Hydrodynamic/Sediment Transport Model (ECOMSED).....	14
2.3.1 Model Framework Configuration.....	15
2.3.2 Model Segmentation.....	16
2.3.3 Boundary Conditions.....	18
2.3.4 Sediment Transport Processes.....	20
2.4 Water Quality Model (RCA).....	21
2.4.1 Model Framework Configuration.....	21
2.4.2 Model Segmentation.....	24
2.4.3 Boundary Conditions.....	24
2.4.4 Eutrophication State Variables.....	25
2.4.5 Eutrophication Processes.....	29
2.5 Post-Processor Development.....	43
2.6 Computational Requirements / Model Implementation.....	46
2.6.1 Computational Requirements.....	46
2.6.2 Runtime Benchmarking.....	46
3. Upper Mississippi River Data Summary.....	49
3.1 Data Sources and Processing.....	49
3.1.1 Metropolitan Council Environmental Services.....	49
3.1.2 Long Term Resource Monitoring Program.....	50
3.1.3 Data Collected by Other Agencies.....	54
3.1.4 Water Quality Database.....	54
3.2 Model Inputs.....	55

3.2.1 Hydrodynamic & Sediment Transport Model (ECOMSED).....	55
3.2.2 Water Quality Model (RCA) .....	58
3.2.3 Point Source Loads .....	65
3.2.4 Environmental Parameters .....	68
3.2.5 Turbidity .....	70
3.2.6 Water Transparency .....	72
4. UMR-LP Model Hydrodynamics and Sediment Transport	
Calibration/Confirmation.....	89
4.1 Calibration/Confirmation parameters .....	89
4.1.1 Hydrodynamic.....	89
4.1.2 Temperature .....	90
4.1.3 Solids Transport .....	91
4.1.4 Solids Loads .....	92
4.2 Calibration/Confirmation Results .....	94
4.2.1 Hydrodynamic.....	94
4.2.2 Temperature .....	95
4.2.3 Solids Transport.....	95
5. UMR-LP Model Water Quality Calibration/Confirmation.....	115
5.1 General Approach .....	115
5.2 Calibration Approach & Parameters .....	116
5.2.1 Overview of Model Re-calibration .....	116
5.2.2 UMR-LP Calibration Coefficients .....	119
5.3 Calibration Results.....	125
5.3.1 Graphical Calibration and Confirmation Results.....	126
5.3.2 Calibration/Confirmation Metrics.....	128
5.4 Model Diagnostic Analyses .....	135
5.4.1 Water Quality .....	135
5.4.2 Lower Food Web Behavior.....	136
5.4.3 Sediment Flux Diagnostics .....	138
6. UMR-LP Model Application .....	271
6.1 General Approach .....	271
6.1.1 Metrics and Targets.....	272
6.1.2 Scenario Development .....	275
6.2 UMR-LP Management Analysis tool .....	276
6.3 Scenario Results and Discussion .....	278
6.3.1 Turbidity Impairment.....	279
6.3.2 Nutrient Enrichment Impairment.....	286
6.3.3 Sediment Deposition and In-Filling of Lake Pepin .....	300
7. Recommendations for TMDL – Year 4 .....	301
8. References .....	303

## LIST OF FIGURES

Figure 6-25. Summer Average Chlorophyll <i>a</i> in Upper Lake Pepin for Scenario 2 and Scenario 17.....	295
Figure 6-26. Summer Average Chlorophyll <i>a</i> in Lower Lake Pepin for Scenario 2 and Scenario 17 .....	296
Figure 6-27. Summer Average Chlorophyll <i>a</i> versus TP in Lake Pepin for 2006 for Simulated Load Reduction Scenarios .....	297
Figure 6-28. Summer Average Chlorophyll <i>a</i> versus TP in Upper and Lower Lake Pepin for 2006 for Simulated Load Reduction Scenarios.....	298
Figure 6-29. Number of Days with Chlorophyll <i>a</i> > 50 µg/L versus Summer Average TP in Upper and Lower Lake Pepin for 2006 for Simulated Load Reduction Scenarios .....	298
Figure 6-30. Summer Average Blue-Green Chlorophyll <i>a</i> versus TP in Upper and Lower Lake Pepin for 2006 for Simulated Load Reduction Scenarios .....	299
Figure 6-31. Summer Average Secchi Depth versus TP in Upper and Lower Lake Pepin for 2006 for Simulated Load Reduction Scenarios.....	299

## LIST OF TABLES

Table 2-1. Upper Mississippi River RCA Water Quality State Variables.....	25
Table 3-1. Phytoplankton Speciation Data Inventory .....	51
Table 3-2. Zooplankton Data Inventory by Study and Agency .....	53
Table 3-3. Summary of UMR Water Quality Database Contents .....	55
Table 3-4. Location of USGS and USACE Gaging Stations and Watershed Areas....	56
Table 3-5. Annual daily average NVSS load for the major tributaries to the UMR system. ....	57
Table 3-6. RCA Upper Mississippi River Water Quality State Variables.....	59
Table 3-7. Annual Total Phosphorus Loadings From Major Tributaries and WWTPs (metric tons/year) .....	61
Table 3-8. Percent Composition of Algal Species for the Minnesota, Mississippi, and St. Croix Rivers .....	64
Table 3-9. Sampling Frequency (times per week) for the WWTPs Represented in the RCA Model Calibration .....	66
Table 3-10. Meteorological Stations Used to Develop UMR-LP Model Boundary Conditions .....	69
Table 3-11. LTRMP Monitoring Summary for UMR-LP Turbidity, TSS, and VSS ..	70
Table 3-12. MCES Monitoring Summary for UMR Turbidity, TSS, and VSS.....	71
Table 4-1. Summary of ECOMSED Model Parameters .....	90
Table 4-2. Meteorological Data Sources .....	91
Table 4-3. ECOMSED Sediment Transport Parameters.....	92
Table 4-4. ECOMSED Solids Loading Summary .....	93
Table 5-1. RCA Water Column Model Coefficients Used in Final Calibration.....	120
Table 5-2. Calibration Coefficients used for Sediment Diagenesis Sub-Model .....	123
Table 5-3. Median Absolute Relative Errors for Upper Lake Pepin (June-September) .....	130
Table 5-4. Median Absolute Relative Errors for Lower Lake Pepin (June-September) .....	131
Table 5-5. Median Absolute Relative Errors for Lake Pepin (June-September).....	132
Table 5-6. Median Absolute Relative Errors for Lock and Dam No. 2 (June- September) .....	133
Table 5-7. Median Absolute Relative Errors for Lock and Dam No. 3 (June- September) .....	134
Table 6-1. Direct WWTP Loadings for UMR-LP Model Application .....	272
Table 6-2. UMR-LP Water Quality Metrics and Targets .....	273
Table 6-3. Load Reduction Scenarios for the UMR-LP Model Application .....	276
Table 6-4. Model-Predicted Average Annual Sediment Deposition Rates for Load Reduction Scenarios (22-Year Period) .....	300
