

DRAFT

**AIR EMISSION PERMIT NO. 16300010-005
Major Amendment**

IS ISSUED TO

Newport Terminal Corp

NEWPORT TERMINAL CORP
50 21st Street
Newport, Washington County, MN 55055

The emission units, control equipment and emission stacks at the stationary source authorized in this permit amendment are as described in the Permit Applications Table.

This permit amendment supersedes Air Emission Permit No. 16300010-004 and authorizes the Permittee to operate and construct the stationary source at the address listed above unless otherwise noted in Table A. The Permittee must comply with all the conditions of the permit. Any changes or modifications to the stationary source must be performed in compliance with Minn. R. 7007.1150 to 7007.1500. Terms used in the permit are as defined in the state air pollution control rules unless the term is explicitly defined in the permit.

Unless otherwise indicated, all the Minnesota rules cited as the origin of the permit terms are incorporated into the State Implementation Plan (SIP) under 40 CFR § 52.1220 and as such are enforceable by U.S. Environmental Protection Agency (EPA) Administrator or citizens under the Clean Air Act.

Permit Type: State; Limits to Avoid Part 70/Limits to Avoid New Source Review

Operating Permit Issue Date: January 8, 2009

Major Amendment Issue Date: <issue date>

Expiration Date: Permit does not expire— Title I Conditions do not expire.

Don Smith, P.E., Manager
Air Quality Permits Section
Industrial Division

for John Linc Stine
Commissioner
Minnesota Pollution Control Agency

Appendices

- I. Part 60 Subpart XX Emission Equation**
- II. Insignificant Activities Required to be Listed**

NOTICE TO THE PERMITTEE:

Your stationary source may be subject to the requirements of the Minnesota Pollution Control Agency's (MPCA) solid waste, hazardous waste, and water quality programs. If you wish to obtain information on these programs, including information on obtaining any required permits, please contact the MPCA general information number at:

Metro Area	651-296-6300
Outside Metro Area	1-800-657-3864
TTY	651-282-5332

The rules governing these programs are contained in Minn. R. chs. 7000-7105. Written questions may be sent to: Minnesota Pollution Control Agency, 520 Lafayette Road North, St. Paul, Minnesota 55155-4194.

Questions about this air emission permit or about air quality requirements can also be directed to the telephone numbers and address listed above.

PERMIT SHIELD:

Subject to the limitations in Minn. R. 7007.1800, compliance with the conditions of this permit shall be deemed compliance with the specific provision of the applicable requirement identified in the permit as the basis of each condition. Subject to the limitations of Minn. R. 7007.1800 and 7017.0100, subp. 2, notwithstanding the conditions of this permit specifying compliance practices for applicable requirements, any person (including the Permittee) may also use other credible evidence to establish compliance or noncompliance with applicable requirements.

FACILITY DESCRIPTION:

The Newport Terminal (facility) is a bulk transfer and storage terminal for petroleum products (gasoline and diesel fuel). The facility consists of three ethanol storage tanks, seven gasoline storage tanks, two small tanks for gasoline additive and for diesel fuel storage, and a transfer station with two loading racks. Loading Rack 1 (used for blended gasoline loadout) has a vapor collections system that vents to a flare with propane pilots. The facility operates under a federally enforceable state operating permit.

Volatile Organic Compounds (VOC) are the main pollutant from the facility, including volatile Hazardous Air Pollutants (HAP). The VOCs are emitted from product loading, storage tank standing and working losses, tank roof landing events, fugitive emissions from valves, pumps, and flanges, and tanker purging. Ethanol and sub-octane gasoline are blended as they are loaded into gasoline cargo tanks to produce 87 octane no lead regular gasoline with 10 percent ethanol and E-85 gasoline with 85% ethanol.

The VOC emissions from unloading of gasoline from delivery trucks to gasoline service station storage tanks at service stations are collected and then displaced from the cargo tanker upon tanker refilling at the facility.

Tankers may occasionally be purged of vapors to allow for maintenance, by pumping air into the tanker to displace the combustible vapors. These vapors cannot be vented to the flare system during purging because this could create explosive mixtures in the vapor collection system as the air/gasoline vapor mixture pass through the explosive range.

The facility is a petroleum storage and transfer unit with a total storage capacity exceeding 300,000 barrels (equivalent to 12.6 mmgal) and therefore is one of the 28 listed source categories under new source review. As a result the facility is subject to the 100 tons per year (tpy) major source threshold of a regulated pollutant, including fugitives. The limited controlled VOC emissions are below Prevention of Significant Deterioration Program (PSD) major source threshold (100 tpy) to avoid PSD permitting requirements.

AMENDMENT DESCRIPTIONS:

Permit Action – 005: Newport Terminal Corp submitted a major amendment to install a 619 HP diesel emergency generator (EU 004). The generator is subject to 40 CFR pt. 63, subp. ZZZZ and 40 CFR pt. 60, subp. IIII, as well as Minn. R. 7011.2300. The emergency generator is included under the total facility VOC limit of 95 tpy, and the Permittee will maintain compliance by installing a non-resettable hour meter on EU 004.

In addition, this permit action includes a minor amendment for installation of a soil vapor extraction unit. Since Newport Terminal Corp submitted this application, the soil vapor extraction unit has been removed. Also included are an initial notification for 40 CFR pt. 63, subp. BBBB and a reopening for a notice of compliance and test frequency plan. The necessary changes that would have resulted from these actions were completed in the Permit Action - 004, and no other changes were incorporated in this permit action.

Permit Action – 004: This is a major amendment to install a vapor recovery unit (VRU) which will replace the existing flare as the primary VOC control device for the gasoline truck loading rack. The new VRU (CE 002) will be a carbon adsorption system with the capability to recover gasoline vapors and return the

recovered gasoline back to the facility's gasoline storage tank system. VOC emissions will be monitored by a CEMS unit (MR 002).

Permit Action – 003: This permit action (initiated by the MPCA) was an administrative amendment to a federally enforceable state operating permit. This permit corrected typographical errors in the GP 001 Standing Losses and Working Losses recordkeeping requirements in permit No. 16300010-002. No emissions changes or facility modifications were authorized by this permit.

Permit Action – 002: This is a major amendment for a New Source Performance Standards modification. The facility loading rack 1 (EU 001) is an affected facility as defined in part 60, subp. XX. The Permittee requested to increase the loading rate of loading rack 1. This is a modification as defined at §§ 60.2 and 60.14. Therefore loading rack 1 becomes subject to part 60 subp. XX. This amendment replaced the 67.2 tpy EU 001 VOC limit with a 95 tpy total facility VOC limit. Restructuring the limit was done in part to account for gasoline storage tank internal floating roof landing emissions that were not included in the original emission calculations for the existing permit (16300010-001) because the calculation procedures for roof landing emissions were not available at that time.

TABLE A: LIMITS AND OTHER REQUIREMENTS

A-1 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Table A contains limits and other requirements with which your facility must comply. The limits are located in the first column of the table (What To do). The limits can be emission limits or operational limits. This column also contains the actions that you must take and the records you must keep to show that you are complying with the limits. The second column of Table A (Why to do it) lists the regulatory basis for these limits. Appendices included as conditions of your permit are listed in Table A under total facility requirements.

Subject Item: Total Facility

What to do	Why to do it
SOURCE-SPECIFIC REQUIREMENTS	hdr
Recordkeeping: Maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of the facility including any malfunction of the air pollution control equipment or any periods during which a continuous monitoring system or monitoring device is inoperative.	40 CFR Section 60.7(b); Minn. R. 7019.0100, subp. 1
Permit Appendices: This permit contains Appendices I and II as listed in the permit Table of Contents. The Permittee shall comply with all requirements contained in the appendices.	40 CFR Section 60.503(c)(3); Minn. R. 7007.0800, subp. 2
TOTAL FACILITY VOC LIMIT	hdr
Volatile Organic Compounds: less than or equal to 95.0 tons/year using 12-month Rolling Sum calculated by the 15th day of each month for the previous 12-month period using the calculation method below. This limit applies to the total VOC emissions from the facility.	Title I Condition: to avoid classification as a major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2
OPERATIONAL REQUIREMENTS	hdr
The Permittee shall comply with National Primary and Secondary Ambient Air Quality Standards, 40 CFR pt. 50, and the Minnesota Ambient Air Quality Standards, Minn. R. 7009.0010 to 7009.0080. Compliance shall be demonstrated upon written request by the MPCA.	Minn. Stat. Section 116.07, subds. 4a & 9; Minn. R. 7007.0100, subp. 7(A), 7(L), & 7(M); Minn. R. 7007.0800, subps. 1, 2 & 4; Minn. R. 7009.0010-7009.0080
Circumvention: Do not install or use a device or means that conceals or dilutes emissions, which would otherwise violate a federal or state air pollution control rule, without reducing the total amount of pollutant emitted.	Minn. R. 7011.0020
Air Pollution Control Equipment: Operate all pollution control equipment whenever the corresponding process equipment and emission units are operated, unless otherwise noted in Table A.	40 CFR Section 63.11085(a); Minn. R. 7007.0800, subp. 2; Minn. R. 7007.0800, subp. 16(J)
Operation and Maintenance Plan: Retain at the stationary source an operation and maintenance plan for all air pollution control equipment. At a minimum, the O & M plan shall identify all air pollution control equipment and control practices and shall include a preventative maintenance program for the equipment and practices, a description of (the minimum but not necessarily the only) corrective actions to be taken to restore the equipment and practices to proper operation to meet applicable permit conditions, a description of the employee training program for proper operation and maintenance of the control equipment and practices, and the records kept to demonstrate plan implementation.	Minn. R. 7007.0800, subp. 14 and 16(J)
Operation Changes: In any shutdown, breakdown, or deviation the Permittee shall immediately take all practical steps to modify operations to reduce the emission of any regulated air pollutant. The Commissioner may require feasible and practical modifications in the operation to reduce emissions of air pollutants. No emissions units that have an unreasonable shutdown or breakdown frequency of process or control equipment shall be permitted to operate.	Minn. R. 7019.1000, subp. 4
Fugitive Emissions: Do not cause or permit the handling, use, transporting, or storage of any material in a manner which may allow avoidable amounts of particulate matter to become airborne. Comply with all other requirements listed in Minn. R. 7011.0150.	Minn. R. 7011.0150
Noise: The Permittee shall comply with the noise standards set forth in Minn. R. 7030.0010 to 7030.0080 at all times during the operation of any emission units. This is a state only requirement and is not enforceable by the EPA Administrator or citizens under the Clean Air Act.	Minn. R. 7030.0010 - 7030.0080
Inspections: The Permittee shall comply with the inspection procedures and requirements as found in Minn. R. 7007.0800, subp. 9(A).	Minn. R. 7007.0800, subp. 9(A)
The Permittee shall comply with the General Conditions listed in Minn. R. 7007.0800, subp. 16.	Minn. R. 7007.0800, subp. 16
PERFORMANCE TESTING	hdr

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-2** 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Performance Testing: Conduct all performance tests in accordance with Minn. R. ch. 7017 unless otherwise noted in Tables A, B, and/or C.	Minn. R. ch. 7017
<p>Performance Test Notifications and Submittals:</p> <p>Performance Tests are due as outlined in Table A of the permit. See Table B for additional testing requirements.</p> <p>Performance Test Notification (written): due 30 days before each Performance Test Performance Test Plan: due 30 days before each Performance Test Performance Test Pre-test Meeting: due 7 days before each Performance Test Performance Test Report: due 45 days after each Performance Test Performance Test Report - Microfiche Copy: due 105 days after each Performance Test</p> <p>The Notification, Test Plan, and Test Report may be submitted in an alternative format as allowed by Minn. R. 7017.2018.</p>	Minn. R. 7017.2018; Minn. R. 7017.2030, subps. 1-4, Minn. R. 7017.2035, subps. 1-2
Limits set as a result of a performance test (conducted before or after permit issuance) apply until superseded as stated in the MPCA's Notice of Compliance letter granting preliminary approval. Preliminary approval is based on formal review of a subsequent performance test on the same unit as specified by Minn. R. 7017.2025, subp. 3. The limit is final upon issuance of a permit amendment incorporating the change.	Minn. R. 7017.2025, subp. 3
MONITORING REQUIREMENTS	hdr
Monitoring Equipment Calibration: The Permittee shall calibrate all required monitoring equipment at least once every 12 months (any requirements applying to continuous emission monitors are listed separately in this permit).	Minn. R. 7007.0800, subp. 4(D)
Operation of Monitoring Equipment: Unless otherwise noted in Tables A, B, and/or C, monitoring a process or control equipment connected to that process is not necessary during periods when the process is shutdown, or during checks of the monitoring systems, such as calibration checks and zero and span adjustments. If monitoring records are required, they should reflect any such periods of process shutdown or checks of the monitoring system.	Minn. R. 7007.0800, subp. 4(D)
RECORDKEEPING	hdr
<p>Monthly VOC Emissions Calculations: by the 15th day of each month, the Permittee shall calculate and record the following:</p> <p>1. total facility VOC emissions during the previous month using the following equation:</p> $TFE = (LR1 + LR2 + TS + TW + TL + FE + TP + EG)/2000$ <p>where:</p> <p>TFE = total terminal facility monthly VOC emissions, tons LR1 = loading rack 1 emissions calculated under EU 001, lb/month LR2 = loading rack 2 emissions calculated under EU 002, lb/month TS = storage tank standing losses calculated under GP 001, lb/month TW = storage tank working losses calculated under GP 001, lb/month TL = tank roof landing emissions calculated under GP 001, lb/month FE = fugitive emissions calculated under FS 001, lb/month TP = tanker purging emissions calculated under FS 002, lb/month EG = emergency generator emissions calculated under EU 004, lb/month</p> <p>2. total facility 12-month rolling sum VOC emissions by summing the monthly VOC emissions from the previous 12 months.</p>	Title I Condition: to avoid classification as a major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2
Recordkeeping: Retain all records at the stationary source, unless otherwise specified within this permit, for a period of five (5) years from the date of monitoring, sample, measurement, or report. Records which must be retained at this location include all calibration and maintenance records, all original recordings for continuous monitoring instrumentation, and copies of all reports required by the permit. Records must conform to the requirements listed in Minn. R. 7007.	Minn. R. 7007.0800, subp. 5(C); meets requirement of 40 CFR Section 60.7(f) & Minn. R. 7019.0100, subp. 1
Recordkeeping: Maintain records describing any insignificant modifications (as required by Minn. R. 7007.1250, subp. 3) or changes contravening permit terms (as required by Minn. R. 7007.1350, subp. 2), including records of the emissions resulting from those changes.	Minn. R. 7007.0800, subp. 5(B)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-3**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

If the Permittee determines that no permit amendment or notification is required prior to making a change, the Permittee must retain records of all calculations required under Minn. R. 7007.1200. These records shall be kept for a period of five years from the date that the change was made. The records shall be kept at the stationary source for the current calendar year of operation and may be kept at the stationary source or office of the stationary source for all other years. The records may be maintained in either electronic or paper format.	Minn. R. 7007.1200, subp. 4
REPORTING/SUBMITTALS	hdr
Shutdown Notifications: Notify the Commissioner at least 24 hours in advance of a planned shutdown of any control equipment or process equipment if the shutdown would cause any increase in the emissions of any regulated air pollutant. If the owner or operator does not have advance knowledge of the shutdown, notification shall be made to the Commissioner as soon as possible after the shutdown. However, notification is not required in the circumstances outlined in Items A, B and C of Minn. R. 7019.1000, subp. 3. At the time of notification, the owner or operator shall inform the Commissioner of the cause of the shutdown and the estimated duration. The owner or operator shall notify the Commissioner when the shutdown is over.	Minn. R. 7019.1000, subp. 3
Breakdown Notifications: Notify the Commissioner within 24 hours of a breakdown of more than one hour duration of any control equipment or process equipment if the breakdown causes any increase in the emissions of any regulated air pollutant. The 24-hour time period starts when the breakdown was discovered or reasonably should have been discovered by the owner or operator. However, notification is not required in the circumstances outlined in Items A, B and C of Minn. R. 7019.1000, subp. 2. At the time of notification or as soon as possible thereafter, the owner or operator shall inform the Commissioner of the cause of the breakdown and the estimated duration. The owner or operator shall notify the Commissioner when the breakdown is over.	Minn. R. 7019.1000, subp. 2
Notification of Deviations Endangering Human Health or the Environment: As soon as possible after discovery, notify the Commissioner or the state duty officer, either orally or by facsimile, of any deviation from permit conditions which could endanger human health or the environment.	Minn. R. 7019.1000, subp. 1
Notification of Deviations Endangering Human Health or the Environment Report: Within 2 working days of discovery, notify the Commissioner in writing of any deviation from permit conditions which could endanger human health or the environment. Include the following information in this written description: 1. the cause of the deviation; 2. the exact dates of the period of the deviation, if the deviation has been corrected; 3. whether or not the deviation has been corrected; 4. the anticipated time by which the deviation is expected to be corrected, if not yet corrected; and 5. steps taken or planned to reduce, eliminate, and prevent reoccurrence of the deviation.	Minn. R. 7019.1000, subp. 1
Application for Permit Amendment: If a permit amendment is needed, submit an application in accordance with the requirements of Minn. R. 7007.1150 through Minn. R. 7007.1500. Submittal dates vary, depending on the type of amendment needed.	Minn. R. 7007.1150 - 7007.1500
Extension Requests: The Permittee may apply for an Administrative Amendment to extend a deadline in a permit by no more than 120 days, provided the proposed deadline extension meets the requirements of Minn. R. 7007.1400, subp. 1(H). Performance testing deadlines from the General Provisions of 40 CFR pt. 60 and pt. 63 are examples of deadlines for which the MPCA does not have authority to grant extensions and therefore do not meet the requirements of Minn. R. 7007.1400, subp. 1(H).	Minn. R. 7007.1400, subp. 1(H)
Emission Inventory Report: due on or before April 1 of each calendar year following permit issuance, to be submitted on a form approved by the Commissioner.	Minn. R. 7019.3000 - 7019.3100
Emission Fees: due 60 days after receipt of an MPCA bill.	Minn. R. 7002.0005 - 7002.0095

This facility meets the definition of an existing bulk gasoline terminal, a gasoline storage and distribution facility that receives gasoline by pipeline, ship or barge, or cargo tank and has a gasoline throughput of 20,000 gallons per day or greater. Gasoline throughput shall be the maximum calculated design throughput as defined at 40 CFR Section 63.11100.	40 CFR Sections 63.11089(e) and 63.11083(b)
For any affected source subject to the provisions of this subpart and another Federal rule, The Permittee may elect to comply only with the more stringent provisions of the applicable subparts. They must consider all provisions of the rules, including monitoring, recordkeeping, and reporting. The Permittee must identify the affected source and provisions with which they will comply in the Notification of Compliance Status required under 40 CFR Section 63.11093. They also must demonstrate in your Notification of Compliance Status that each provision with which the Permittee will comply is at least as stringent as the otherwise applicable requirements in this subpart.	40 CFR Section 63.11081 (i)
The Permittee is responsible for making accurate determinations concerning the more stringent provisions; noncompliance with this rule is not excused if it is later determined that your determination was in error, and, as a result, The Permittee is violating this subpart. Compliance with this rule is the responsibility of The Permittee's, and the Notification of Compliance Status does not alter or affect that responsibility.	40 CFR Section 63.11081 (i)
The Permittee must, at all times, operate and maintain any affected source, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Administrator, which may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source .	40 CFR Section 63.11085 (a)
For each gasoline storage tank with a capacity of greater than or equal to 75 cubic meters, the Permittee must equip each internal floating roof gasoline storage tank according to the requirements in 40 CFR Section 60.112b(a)(1), except for the secondary seal requirements under 40 CFR Section 60.112b(a)(1)(ii)(B) and the requirements in 40 CFR Section 60.112b(a)(1)(iv) through (ix)	40 CFR Section 63.11087(a); 40 CFR Section 60.112(b); Minn. R. 7011.1520
For each gasoline terminal loading rack with a gasoline throughput of greater than or equal to 250,000 gallons per day, where gallons per day is calculated by summing the current day's throughput, plus the throughput for the previous 364 days, and then dividing that sum by 365, the Permittee must: (a) Equip loading rack(s) with a vapor collection system designed to collect the TOC vapors displaced from cargo tanks during product loading; and (b) Reduce emissions of TOC to less than or equal to 80 mg/l of gasoline loaded into gasoline cargo tanks at the loading rack; and	40 CFR Section 63.11088(a); 40 CFR Section 60.112(b); Minn. R. 7011.1520

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-7** 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

continued: (c) Design and operate the vapor collection system to prevent any TOC vapors collected at one loading rack or lane from passing through another loading rack or lane to the atmosphere; and (d) Limit the loading of gasoline into gasoline cargo tanks that are vapor tight using the procedures specified in 40 CFR Section 60.502(e) through (j) of this chapter. For the purposes of this section, the term "tank truck" as used in 40 CFR Section 60.502(e) through (j) of this chapter means "cargo tank" as defined in 40 CFR Section 63.11100 .	40 CFR Section 63.11088(a); 40 CFR Section 60.112(b); Minn. R. 7011.1520
The Permittee shall comply with the requirements of this subpart by the applicable dates specified in 40 CFR Section 63.11083, except that storage vessels equipped with floating roofs and not meeting the requirements of paragraph (a) of this section must be in compliance at the first degassing and cleaning activity after January 10, 2011 or by January 10, 2018, whichever is first .	40 CFR Section 63.11087 (b); Minn. R. 7011.1520
INSPECTION REQUIREMENTS	hdr
Monthly Leak Inspections: The Permittee shall perform a monthly leak inspection of all equipment in gasoline service, as defined in 40 CFR Section 63.11100. For this inspection, detection methods incorporating sight, sound, and smell are acceptable. 40 CFR Section 63.11100 defines 'in gasoline service' as a piece of equipment used in a system that transfers gasoline or gasoline vapors and 'monthly' as once per calendar month at regular intervals of no less than 28 days and no more than 35 days.	40 CFR Sections 63.11089(a) and 63.11100
Leak Inspection Recordkeeping: A log book shall be used and shall be signed by the Permittee at the completion of each inspection. A section of the log book shall contain a list, summary description, or diagram(s) showing the location of all equipment in gasoline service at the facility.	40 CFR Section 63.11089(b)
Each detection of a liquid or vapor leak shall be recorded in the log book. When a leak is detected, an initial attempt at repair shall be made as soon as practicable but no later than 5 calendar days after the leak is detected. Repair or replacement of leaking equipment shall be completed within 15 calendar days after detection of each leak, except as provided in the requirement listed below (referring to 40 CFR Section 63.11089(d)).	40 CFR Section 63.11089(c)
Delay of Equipment Leak Repair: Delay of repair of leaking equipment will be allowed if the repair is not feasible within 15 days. The Permittee shall provide in the semiannual Excess Emissions Report specified in 40 CFR Section 63.11095(b), the reason(s) why the repair was not feasible and the date each repair was completed.	40 CFR Section 63.11089(d)
The Permittee shall install, calibrate, certify, operate, and maintain, according to the manufacturer's specifications, a continuous monitoring system (CMS) while gasoline vapors are displaced to the vapor processor systems. As specified below: (1) This includes MR 001, Flare CMS for CE 001 and (2) MR 002, VRU CEMS, for CE 002.	40 CFR Section 63.11092(b)
The Permittee shall monitor the operation of CE 002 using MR 003, a continuous emissions monitoring system (CEMS), or, when using CE001, monitor CE001 using MR001 continuous monitoring system (CMS).	40 CFR Section 63.11092(b)(1)(i)(A)
TESTING AND MONITORING REQUIREMENTS	hdr
The Permittee shall conduct a performance test on the vapor processing and collection systems (CE 002) according to either 40 CFR Section 63.11092(a)(1)(i) or (a)(1)(ii). Test method specifications for 40 CFR Section 63.11092(a)(1)(i) is described in the performance test requirements for EU 001 with the exception that a reading of 500 parts per million shall be used to determine the level of leaks to be repaired.	40 CFR Section 63.11092(a)
The performance test requirements of 40 CFR Section 63.11092(a) do not apply to flares defined in 40 CFR Section 63.11100 and meeting the flare requirements in 40 CFR Section 63.11(b). The Permittee shall demonstrate that the flare and associated vapor collection system is in compliance with the requirements in 40 CFR Sections 63.11(b) and 60.503(a), (b), and (d).	40 CFR Section 63.11092(a)(4)
The Permittee shall keep records of the test results for each gasoline cargo tank loading at the facility as specified below: (1) Annual certification testing performed under 40 CFR Section 63.11092(f)(1).	40 CFR Section 63.11094(b)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-8**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

continued: (2) The documentation file shall be kept up-to-date for each gasoline cargo tank loading at the facility. The documentation for each test shall include, as a minimum, the following information: (i) Name of test: Annual Certification Test Method 27 or Periodic Railcar Bubble Leak Test Procedure. (ii) Cargo tank owner's name and address. (iii) Cargo tank identification number. (iv) Test location and date. (v) Tester name and signature. (vi) Witnessing inspector, if any: Name, signature, and affiliation. (vii) Vapor tightness repair: Nature of repair work and when performed in relation to vapor tightness testing. (viii) Test results: Test pressure; pressure or vacuum change, mm of water; time period of test; number of leaks found with instrument; and leak definition .	40 CFR Section 63.11094(b), continued
continued: (3) If the Permittee is complying with the alternative requirements in 40 CFR Section 63.11088(b), they must keep records documenting that the Permittee has verified the vapor tightness testing according to the requirements of the Administrator .	40 CFR Section 63.11094(b), continued
For performance tests performed after the initial test required by 40 CFR Section 63.11092(a), the Permittee shall document the reasons for any change in the operating parameter value since the previous performance test.	40 CFR Section 63.11092(c)
The Permittee shall: (1) Operate the vapor processing system in a manner not to exceed or not to go below, as appropriate, the operating parameter value for the parameters described in 40 CFR Section 63.11092(b)(1). (2) In cases where an alternative parameter pursuant to 40 CFR Section 63.11092(b)(1)(iv) or (b)(5)(i) is approved, the Permittee shall operate the vapor processing system in a manner not to exceed or not to go below, as appropriate, the alternative operating parameter value. (3) Operation of the vapor processing system in a manner exceeding or going below the operating parameter value, as appropriate, shall constitute a violation of the emission standard in 40 CFR Section 63.11088(a), except as specified in 40 CFR Section 63.11092(d)(4).	40 CFR Section 63.11092(d)
For each gasoline storage tanks equipped with an internal floating roof, the Permittee must perform inspections of the floating roof system according to the requirements of 40 CFR Section 60.113b(a).	40 CFR Sections 63.11092(e)(1) and 60.113b(a); Minn. R. 7011.1520
The annual certification test for each gasoline cargo tank shall consist of the test methods specified in 40 CFR Section 63.11092(f)(1) or (2). Facilities that are also subject to 40 CFR pt. 60, subp. XX may elect, after notification to the MPCA, to comply with 40 CFR Section 63.11092(f)(1) or (2)..	40 CFR Section 63.11092(f)
Conduct of performance tests. Performance tests conducted for this subpart shall be conducted under such conditions as the Administrator specifies to the owner or operator, based on representative performance (i.e., performance based on normal operating conditions) of the affected source. Upon request, the owner or operator shall make available to the Administrator such records as may be necessary to determine the conditions of performance tests.	40 CFR Section 63.11092 (g)
The Permittee shall develop and submit to the Administrator a monitoring and inspection plan that describes the Permittee's approach for meeting the following requirements: 1) CE 001 and CE 002 shall be equipped to automatically prevent gasoline loading operations from beginning at any time that the pilot flame is absent at CE 001, or the VOC CEMS indicates CE 002 is not operating within its operating parameter limit. The shutdown requirement will apply to the control device (CE 001 or CE 002) which is in active service. 2) The Permittee shall verify, during each day of operation of EU 001, the proper operation of the assist-air blower, the vapor line valve, and the emergency shutdown system. Verification shall be through visual observation or through an automated alarm or shutdown system that monitors and records system operation. A manual or electronic record of the start and end of a shutdown event may be used.	40 CFR Section 63.11092(b)(1)(iii)(B)(2)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-9**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

continued: 3) The Permittee shall perform semi-annual preventive maintenance inspections of the thermal oxidation system and carbon adsorption systems, including the automated alarm or shutdown system for those units so equipped, according to the recommendations of the manufacturer of the system. 4) The monitoring plan shall specify conditions that would be considered CE 001 and 002 malfunctions during the inspections or automated monitoring performed under 40 CFR Section 63.11092(b)(1)(iii)(B)(2)(ii) and (iii), describe specific corrective actions that will be taken to correct any malfunction, and define what the Permittee would consider to be a timely repair for each potential malfunction.	40 CFR Section 63.11092(b)(1)(iii)(B)(2), continued
continued: 5) The Permittee shall document any CE 001 and CE 002 malfunction, as defined in the monitoring and inspection plan, and any activation of the automated alarm or shutdown system with a written entry into a log book or other permanent form of record. Such record shall also include a description of the corrective action taken and whether such corrective actions were taken in a timely manner, as defined in the monitoring and inspection plan, as well as an estimate of the amount of gasoline loaded during the period of the malfunction.	40 CFR Section 63.11092(b)(1)(iii)(B)(2), continued
The Permittee shall determine an operating parameter value based on the parameter data monitored during the performance test, supplemented by engineering assessments and the manufacturer's recommendations. The Permittee shall provide for the Administrator's approval the rationale for the selected operating parameter value, monitoring frequency, and averaging time, including data and calculations used to develop the value and a description of why the value, monitoring frequency, and averaging time demonstrate continuous compliance with the emission standard in 40 CFR Section 63.11088(a).	40 CFR Section 63.11092(b)(3) and (4)
The Permittee shall: (1) Operate the vapor processing system in a manner not to exceed or not to go below, as appropriate, the operating parameter value for the parameters described in 40 CFR Section 63.11092(b)(1). (2) Operation of the vapor processing system in a manner exceeding or going below the operating parameter value, as appropriate, shall constitute a violation of the emission standard in 40 CFR Section 63.11088(a), except as specified in 40 CFR Section 63.11092(d)(4).	40 CFR Section 63.11092(d)(1)-(3)
The Permittee shall keep records as specified in 40 CFR Section 60.115b, except records shall be kept for at least 5 years.	40 CFR Section 63.11094(a)
RECORDKEEPING	hdr
The Permittee shall prepare and maintain a record describing the types, identification numbers, and locations of all equipment in gasoline service. If the Permittee elects to implement an instrument program under 40 CFR Section 63.11089, the record shall contain a full description of the program.	40 CFR Section 63.11094(d)
The Permittee shall record in the log book for each leak that is detected the information specified below: (1) The equipment type and identification number. (2) The nature of the leak (i.e. vapor or liquid) and the method of detection (i.e. sight, sound, or smell). (3) The date the leak was detected and the date of each attempt to repair the leak. (4) Repair methods applied in each attempt to repair the leak. (5) A statement of: Repair Delayed and the reason for the delay if the leak is not repaired within 15 calendar days after discovery of the leak. (6) The expected date of successful repair of the leak if the leak is not repaired within 15 days. (7) The date of successful repair of the leak.	40 CFR Section 63.11094(e)
The Permittee shall: (1) Keep an up-to-date, readily accessible record of the continuous monitoring data required under 40 CFR Section 63.11092(b) or 63.11092(e). This record shall indicate the time intervals during which loadings of gasoline cargo tanks have occurred or, alternatively, shall record the operating parameter data only during such loadings. The date and time of day shall also be indicated at reasonable intervals on this record.	40 CFR Section 63.11094(f)

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>(2) Record and report simultaneously with the Notification of Compliance Status required under 40 CFR Section 63.11093(b) all data and calculations, engineering assessments, and manufacturer's recommendations used in determining the operating parameter value under 40 CFR Section 63.11092(b) or 63.11092(e).</p> <p>(ii) The following information when using a flare under provisions of 63.11(b) to comply with:</p> <p>(A) Flare design (i.e., steam-assisted, air-assisted, or non-assisted); and</p> <p>(B) All visible emissions (VE) readings, heat content determinations, flow rate measurements, and exit velocity determinations made during the compliance determination required under 40 CFR Section 63.11092(e)(3).</p>	40 CFR Section 63.11094(f), continued
<p>(3) Keep an up-to-date, readily accessible copy of the monitoring and inspection plan required under 40 CFR Section 63.11092(b)(1)(i)(B)(2) or (iii)(B)(2).</p> <p>(4) Keep an up-to-date, readily accessible record of all system malfunctions, as specified in 40 CFR Section 63.11092(b)(1)(i)(B)(2)(v) or (iii)(B)(2)(v).</p> <p>(5) If a Permittee requests approval to use a vapor processing system or monitor an operating parameter other than those specified in 40 CFR Section 63.11092(b), the Permittee shall submit a description of planned reporting and recordkeeping procedures.</p>	40 CFR Section 63.11094(f), continued
<p>The Permittee shall keep the following records:</p> <p>1) Records of the occurrence and duration of each malfunction of operation (i.e., process equipment) or the air pollution control and monitoring equipment.</p> <p>2) Records of actions taken during periods of malfunction to minimize emissions in accordance with 40 CFR Section 63.11085(a), including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation.</p>	40 CFR Section 63.11094(g)
<p>The Permittee shall under this subpart must submit a Notification of Performance Test, as specified in 40 CFR Section 63.9(e), prior to initiating testing required by 40 CFR Sections 63.11092(a) or 63.11092(b) and other additional notifications specified in 40 CFR Section 63.9, as applicable.</p>	40 CFR Section 63.11093 (c) and (d)
<p>As an alternative to keeping records at the terminal of each gasoline cargo tank test result as required in paragraph (b) of this section, The Permittee may comply with the requirements in either paragraph (c)(1) or paragraph (c)(2) of this section. This includes:</p> <p>(1) An electronic copy of each record is instantly available at the terminal.</p> <p>(i) The copy of each record in paragraph (c)(1) of this section is an exact duplicate image of the original paper record with certifying signatures.</p> <p>(ii) The Administrator is notified in writing that each terminal using this alternative is in compliance with paragraph (c)(1) of this section.</p>	40 CFR Section 63.11094 (3)(c)
<p>For facilities that use a terminal automation system to prevent gasoline cargo tanks that do not have valid cargo tank vapor tightness documentation from loading (e.g., via a card lock-out system), a copy of the documentation is made available (e.g., via facsimile) for inspection by the Administrator's delegated representatives during the course of a site visit, or within a mutually agreeable time frame.</p> <p>(i) The copy of each record in paragraph (c)(2) of this section is an exact duplicate image of the original paper record with certifying signatures.</p> <p>(ii) The Administrator is notified in writing that each terminal using this alternative is in compliance with paragraph (c)(2) of this section.</p>	40 CFR Section 63.11094 (3)(c)(2)
REPORTING	hdr
<p>The Permittee shall also include the following in the Semiannual Deviations Report (Isited in Table B of this permit), as applicable:</p> <p>1) For storage vessels complying with option 2(b) in Table 1 of 40 CFR pt. 63, subp. BBBBBB, the information specified in 40 CFR Section 60.115b(a), 60.115b(b), or 60.115b(c), depending upon the control equipment installed;</p> <p>2) For loading racks, each loading of a gasoline cargo tank for which vapor tightness documentation had not been previously obtained by the facility; and</p> <p>3) For equipment leak inspections, the number of equipment leaks not repaired within 15 days after detection.</p>	40 CFR Section 63.11095(a)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-11****04/02/13**

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

The Permittee shall submit a semiannual excess emissions (EER) report to the Administrator, as defined in 40 CFR Section 63 subpart BBBBBB, with the Semiannual Deviations Report listed in this permit. Excess emissions events, and the information to be included in the excess emissions report, are as follows: (1) Each instance of a non-vapor-tight gasoline cargo tank loading at the facility in which the Permittee failed to take steps to assure that such cargo tank would not be reloaded at the facility before vapor tightness documentation for that cargo tank was obtained. (2) Each reloading of a non-vapor-tight gasoline cargo tank at the facility before vapor tightness documentation for that cargo tank is obtained by the facility in accordance with 40 CFR Section 63.11094(b).	40 CFR Section 63.11095(b)
continued: (3) Each exceedance or failure to maintain, as appropriate, the monitored operating parameter value determined under 40 CFR Section 63.11092(b). The report shall include the monitoring data for the days on which exceedances or failures to maintain have occurred, and a description and timing of the steps taken to repair or perform maintenance on the vapor collection and processing systems or the CMS. (4) Each instance in which malfunctions discovered during the monitoring and inspections required under 40 CFR Section 63.11092(b)(1)(i)(B)(2) and (iii)(B)(2) were not resolved according to the necessary corrective actions described in the monitoring and inspection plan. The report shall include a description of the malfunction and the timing of the steps taken to correct the malfunction.	40 CFR Section 63.11095(b), continued
continued: (5) For each occurrence of an equipment leak for which no repair attempt was made within 5 days or for which repair was not completed within 15 days after detection: (i) The date on which the leak was detected; (ii) The date of each attempt to repair the leak; (iii) The reasons for the delay of repair; and (iv) The date of successful repair.	40 CFR Section 63.11095(b), continued
The Permittee shall submit a semiannual report including the number, duration, and a brief description of each type of malfunction which occurred during the reporting period and which caused or may have caused any applicable emission limitation to be exceeded. The report must also include a description of actions taken by the Permittee during a malfunction to minimize emissions in accordance with 40 CFR Section 63.11085(a), including actions taken to correct a malfunction. The report may be submitted as a part of the semiannual compliance report.	40 CFR Section 63.11095(d)

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>(3)(i) The Permittee shall cross-check each tank identification number obtained in Section 60.502(e)(2) with the file of tank vapor tightness documentation within 2 weeks after the corresponding tank is loaded, unless either of the following conditions is maintained:</p> <p>(A) If less than an average of one gasoline tank truck per month over the last 26 weeks is loaded without vapor tightness documentation then the documentation cross-check shall be performed each quarter; or</p> <p>(B) If less than an average of one gasoline tank truck per month over the last 52 weeks is loaded without vapor tightness documentation then the documentation cross-check shall be performed semiannually.</p> <p>(ii) If either the quarterly or semiannual cross-check reveals that these conditions were not maintained, the source must return to biweekly monitoring until such time as these conditions are again met.</p> <p>continued</p>	<p>40 CFR Section 60.502(e) (continued); Minn. R. 7011.1550</p>
<p>(4) The Permittee shall notify the owner or operator of each non-vapor-tight gasoline tank truck loaded at the affected facility within 1 week of the documentation cross-check in Section 60.502(e)(3).</p> <p>(5) The Permittee shall take steps assuring that the nonvapor-tight gasoline tank truck will not be reloaded at the affected facility until vapor tightness documentation for that tank is obtained.</p> <p>(6) Alternate procedures to those described in Section 60.502(e)(1) through (5) for limiting gasoline tank truck loadings may be used upon application to, and approval by, the Administrator.</p>	<p>40 CFR Section 60.502(e) (continued); Minn. R. 7011.1550</p>
<p>(f) The Permittee shall act to assure that loadings of gasoline tank trucks at the affected facility are made only into tanks equipped with vapor collection equipment that is compatible with the EU 001 vapor collection system.</p> <p>(g) The Permittee shall act to assure that the EU 001 and the tank truck vapor collection systems are connected during each loading of a gasoline tank truck at the affected facility. Examples of actions to accomplish this include training drivers in the hookup procedures and posting visible reminder signs at the affected loading racks.</p>	<p>40 CFR Section 60.502(f) & (g); Minn. R. 7011.1550</p>
<p>(h) The vapor collection and liquid loading equipment shall be designed and operated to prevent gauge pressure in the delivery tank from exceeding 4,500 pascals (450 mm of water) during product loading. This level is not to be exceeded when measured by the procedures specified in Section 60.503(d).</p> <p>(i) The EU 001 vapor collection system pressure-vacuum vent shall not open at a system pressure less than 4,500 pascals (450 mm of water).</p> <p>(j) Each calendar month, the vapor collection system, the vapor processing system, and EU 001 shall be inspected during the loading of gasoline tank trucks for total organic compounds liquid or vapor leaks. For purposes of this paragraph, detection methods incorporating sight, sound, or smell are acceptable. Each detection of a leak shall be recorded and the source of the leak repaired within 15 calendar days after it is detected.</p>	<p>40 CFR Section 60.502(h) - (j); Minn. R. 7011.1550</p>
<p>TEST METHODS AND PROCEDURES</p>	<p>hdr</p>
<p>Performance Test: due before 04/23/2014 after CE 002 is installed. Testing shall be conducted according to the requirements specified in 40 CFR Section 60.503.</p> <p>This satisfies the test requirements found at 40 CFR Section 63.11092 (a)(1).</p>	<p>40 CFR Section 60.8(a); Minn. R. 7017.2020, subp. 1</p>
<p>(a) In conducting the performance tests required in Section 60.8, the Permittee shall use as reference methods and procedures the test methods in appendix A of part 60 part or other methods and procedures as specified in Section 60.8, except as provided in Section 60.8(b). The three-run requirement of Section 60.8(f) does not apply to this subpart.</p> <p>(b) Immediately before the performance test required to determine compliance with Section 60.502(b) and (h), the Permittee shall use Method 21 to monitor for leakage of vapor all potential sources in the EU 001 vapor collection system equipment while a gasoline tank truck is being loaded. The Permittee shall repair all leaks with readings of 10,000 ppm (as methane) or greater before conducting the performance test.</p>	<p>40 CFR Section 60.503(a) & (b); Minn. R. 7011.1550</p>

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-14**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>(c) The Permittee shall determine compliance with the standards in Section 60.502(b) as follows:</p> <p>(1) The performance test shall be 6 hours long during which at least 300,000 liters of gasoline is loaded. If this is not possible, the test may be continued the same day until 300,000 liters of gasoline is loaded or the test may be resumed the next day with another complete 6-hour period. In the latter case, the 300,000-liter criterion need not be met. However, as much as possible, testing should be conducted during the 6-hour period in which the highest throughput normally occurs.</p> <p>continued</p>	<p>40 CFR Section 60.503(c); Minn. R. 7011.1550</p>
<p>(2) If the EU 001 vapor processing system is intermittent in operation, the performance test shall begin at a reference vapor holder level and shall end at the same reference point. The test shall include at least two startups and shutdowns of the vapor processor. If this does not occur under automatically controlled operations, the system shall be manually controlled.</p> <p>(3) The emission rate (E) of total organic compounds shall be computed using the equation in Appendix I of this permit.</p> <p>continued</p>	<p>40 CFR Section 60.503(c) (continued); Minn. R. 7011.1550</p>
<p>(4) The performance test shall be conducted in intervals of 5 minutes. For each interval "i", readings from each measurement shall be recorded, and the volume exhausted (Vesi) and the corresponding average total organic compounds concentration (Cei) shall be determined. The sampling system response time shall be considered in determining the average total organic compounds concentration corresponding to the volume exhausted.</p> <p>(5)(i) Method 2B shall be used to determine the volume (Vesi) air-vapor mixture exhausted at each interval.</p>	<p>40 CFR Section 60.503(c) (continued); Minn. R. 7011.1550</p>
<p>(6) Method 25A or 25B shall be used for determining the total organic compounds concentration (Cei) at each interval. The calibration gas shall be either propane or butane. The Permittee may exclude the methane and ethane content in the exhaust vent by any method (e.g., Method 18) approved by the Administrator.</p> <p>(7) To determine the volume (L) of gasoline dispensed during the EU 001 performance test, facility records or readings from EU 001 gasoline dispensing meters shall be used.</p>	<p>40 CFR Section 60.503(c) (continued); Minn. R. 7011.1550</p>
<p>(d) The Permittee shall determine compliance with the standard in Section 60.502(h) as follows:</p> <p>(1) A pressure measurement device (liquid manometer, magnehelic gauge, or equivalent instrument), capable of measuring up to 500 mm of water gauge pressure with ± 2.5 mm of water precision, shall be calibrated and installed on the EU 001 vapor collection system at a pressure tap located as close as possible to the connection with the gasoline tank truck.</p> <p>(2) During the performance test, the pressure shall be recorded every 5 minutes while a gasoline truck is being loaded; the highest instantaneous pressure that occurs during each loading shall also be recorded. Every loading position must be tested at least once during the performance test.</p>	<p>40 CFR Section 60.503(d); Minn. R. 7011.1550</p>
<p>(f) The Permittee shall use alternative test methods and procedures in accordance with the alternative test method provisions in Section 60.8(b) for flares that do not meet the requirements in Section 60.18(b).</p>	<p>40 CFR Section 60.503(f); Minn. R. 7011.1550</p>
RECORDKEEPING AND REPORTING	hdr
<p>Records Retention Period: Minn. R. 7007.0800, subp. 5(C) requires record retention for a period of five years. Although 40 CFR part 60 subp. XX requires record retention for only a 2 or 3 year period, the Permittee shall meet the 5-year retention requirement of Minn. R. 7007.0800, subp. 5(C) for all records required by 40 CFR part 60 subp. XX.</p>	<p>Minn. R. 7007.0800, subps. 2 & 5(C)</p>

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-15****04/02/13**

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>(a) The tank truck vapor tightness documentation required under Section 60.502(e)(1) shall be kept on file at the terminal in a permanent form available for inspection.</p> <p>(b) The documentation file for each gasoline tank truck shall be updated at least once per year to reflect current test results as determined by Method 27. This documentation shall include, as a minimum, the following information:</p> <p>(1) Test title: Gasoline Delivery Tank Pressure Test-EPA Reference Method 27.</p> <p>(2) Tank owner and address.</p> <p>(3) Tank identification number.</p> <p>(4) Testing location.</p> <p>(5) Date of test.</p> <p>(6) Tester name and signature.</p> <p>(7) Witnessing inspector, if any: Name, signature, and affiliation.</p> <p>(8) Test results: Actual pressure change in 5 minutes, mm of water (average for 2 runs).</p>	<p>40 CFR Section 60.505(a) & (b); Minn. R. 7011.1550</p>
<p>(c) A record of each monthly leak inspection required under Section 60.502(j) shall be kept on file at the terminal for at least 2 years. Inspection records shall include, as a minimum, the following information:</p> <p>(1) Date of inspection.</p> <p>(2) Findings (may indicate no leaks discovered; or location, nature, and severity of each leak).</p> <p>(3) Leak determination method.</p> <p>(4) Corrective action (date each leak repaired; reasons for any repair interval in excess of 15 days).</p> <p>(5) Inspector name and signature.</p> <p>(d) The Permittee shall keep documentation of all notifications required under Section 60.502(e)(4) on file at the facility for at least 2 years.</p>	<p>40 CFR Section 60.505(c) & (d); Minn. R. 7011.1550</p>
<p>(e) As an alternative to keeping records at the facility of each gasoline cargo tank test result as required in 40 CFR Section 60.505(a), (c), and (d), the Permittee may comply with the requirements in either 40 CFR Section 60.505(e)(1) or 40 CFR Section 60.505(e)(2).</p> <p>(1) An electronic copy of each record is instantly available at the facility.</p> <p>(i) The copy of each record in Section 60.505(e)(1) is an exact duplicate image of the original paper record with certifying signatures.</p> <p>(ii) The permitting authority is notified in writing that the facility is in compliance with Section 60.505(e)(1).</p> <p>continued</p>	<p>40 CFR Section 60.505(e)(1); Minn. R. 7011.1550</p>
<p>(2) For facilities that utilize a terminal automation system to prevent gasoline cargo tanks that do not have valid cargo tank vapor tightness documentation from loading (e.g., via a card lock-out system), a copy of the documentation is made available (e.g., via facsimile) for inspection by permitting authority representatives during the course of a site visit, or within a mutually agreeable time frame.</p> <p>(i) The copy of each record in Section 60.505(e)(2) is an exact duplicate image of the original paper record with certifying signatures.</p> <p>(ii) The permitting authority is notified in writing that the facility is in compliance with Section 60.505(e)(2).</p>	<p>40 CFR Section 60.505(e)(2); Minn. R. 7011.1550</p>
<p>(f) The Permittee shall keep records of all replacements or additions of components performed on an existing vapor processing system for at least 3 years.</p>	<p>40 CFR Section 60.505(f); Minn. R. 7011.1550</p>

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-16**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Subject Item: EU 002 Loading Rack 2 - diesel fuel and loading

What to do	Why to do it
<p>Recordkeeping - Fuel Oil Loading:</p> <p>By the 15th day of each month for the previous month the Permittee shall calculate and record the gallons of No. 1 Fuel Oil and No. 2 Fuel Oil. Separate records of each fuel oil grade shall be kept.</p>	<p>Title I Condition: To avoid classification as major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5</p>
<p>Loading Rack 2 Emissions Calculations:</p> <p>By the 15th day of each month the Permittee shall calculate and record the loading rack 2 VOC emissions for the previous month using the following equation:</p> $LR2 = [A1 * 0.0176 \text{ lb/mgal}] + [D2 * 0.0134 \text{ lb/mgal}]/1000$ <p>where:</p> <p>LR2 = loading rack 2 monthly emissions, lb/month A1 = gallons of No. 1 Fuel Oil loaded during the previous month D2 = gallons of No. 2 Fuel Oil loaded during the previous month</p>	<p>Title I Condition: To avoid classification as major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5</p>

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Subject Item: EU 004 Diesel emergency generator**Associated Items:** SV 005 Emergency Diesel Generator

What to do	Why to do it
Recordkeeping - Emergency Generator: By the 15th day of each month for the previous month the Permittee shall record the hours of operation for EU 004.	Title I Condition: To avoid classification as major source and modification under 40 CFR Section 52.21 & Minn. R. 7007.3000; to avoid major source classification under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5
Emergency Generator Emissions Calculations: By the 15th day of each month the Permittee shall calculate and record the emergency generator VOC emissions for the previous month using the following equation: $EG = 0.09 \text{ lb/MMBtu} * 4.33 \text{ MMBtu/hr} * MH$ where: MH = hours of operation for EU 004 recorded during the previous month	Title I Condition: To avoid classification as major source and modification under 40 CFR Section 52.21 & Minn. R. 7007.3000; to avoid major source classification under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5
EMISSION LIMITS	hdr
Opacity: less than or equal to 20 percent opacity once operating temperatures have been attained.	Minn. R. 7011.2300, subp. 1
Sulfur Dioxide: less than or equal to 0.5 lbs/million Btu heat input	Minn. R. 7011.2300, subp. 2
Sulfur Content of Fuel: less than or equal to 0.0015 percent by weight	Minn. R. 7007.0800, subp. 2
OPERATING CONDITIONS	hdr
Fuel type: diesel fuel oil and diesel fuel oil blends only, by design.	Minn. R. 7005.0100, subp. 35a
Operating Hours: less than or equal to 500 hours/year using 12-month Rolling Sum to be calculated by the 15th day of each month.	Title I Condition: To avoid classification as major source and modification under 40 CFR Section 52.21 & Minn. R. 7007.3000
RECORDKEEPING REQUIREMENTS	hdr
Hours of Operation: The Permittee shall maintain documentation on site that the unit is an emergency generator by design that qualifies under the U.S. EPA memorandum entitled "Calculating Potential to Emit (PTE) for Emergency Generators" dated September 6, 1995, limiting operation to 500 hours per year.	Minn. R. 7007.0800, subp. 4 & 5
Fuel Supplier Certification: The Permittee shall obtain and maintain a fuel supplier certification for each shipment of diesel fuel and diesel fuel oil blend used in EU 004, certifying that the sulfur content does not exceed 0.0015% by weight.	Minn. R. 7007.0800, subps. 4 & 5
The Permittee shall keep records of fuel type and usage based on fuel supply records. The Permittee shall keep a copy of all fuel delivery reports and purchase orders for five years from the date of record or receipt.	Minn. R. 7007.0800, subp. 5
PART 63 SUBPART ZZZZ NESHAP REQUIREMENTS	hdr
PART 63 SUBPART ZZZZ NESHAP APPLICABILITY	hdr
40 CFR pt. 63, subp. ZZZZ applies to each affected source. EU 004 is a new stationary RICE located at an area source that commenced construction on or after June 12, 2006 and is an affected source at the facility.	40 CFR Section 63.6590(a)(2)(iii); Minn. R. 7011.8150
PART 63 SUBPART ZZZZ NESHAP OPERATIONAL REQUIREMENTS	hdr
EU 004 meets the criteria in 40 CFR Section 63.6590(c)(1) and shall meet the requirements of 40 CFR pt. 63, subp. ZZZZ by meeting the requirements of 40 CFR pt. 60, subp. IIII, for compression ignition engines. No further requirements apply for EU 004 under 40 CFR pt. 63, subp. ZZZZ.	40 CFR Section 63.6590(c)(1); Minn. R. 7011.8150
PART 60 SUBPART IIII NSPS REQUIREMENTS	hdr
PART 60 SUBPART IIII NSPS APPLICABILITY	hdr
For the purposes of 40 CFR pt. 60, subp. IIII, the date that construction commences is the date the engine is ordered by the Permittee. The Permittee is a owner and operator of EU 004 which is stationary CI ICE that commenced construction after July 11, 2005, and is manufactured after April 1, 2006.	40 CFR Section 63.6590(a)(2)(iii); 40 CFR Section 60.4200(a)(2)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-18**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

The provisions of 40 CFR Section 60.4208 are applicable to all owners and operators of stationary CI ICE that commence construction after July 11, 2005.	40 CFR Section 60.4200(a)(4)
PART 60 SUBPART IIII NSPS LIMITS	hdr
NMHC+NOx: less than or equal to 4.0 grams/kilowatt-hour exhaust emissions from EU 004. Exhaust emissions of nitrogen oxides, hydrocarbon, and nonmethane hydrocarbon are measured using the procedures in 40 CFR pt. 89, subp. E.	40 CFR Section 60.4205(b); 40 CFR Section 60.4202(a)(2); 40 CFR Section 89.112(a)
Carbon Monoxide: less than or equal to 3.5 grams/kilowatt-hour exhaust emissions from EU 004. Exhaust emissions of carbon monoxide are measured using the procedures in 40 CFR pt. 89, subp. E.	40 CFR Section 60.4205(b); 40 CFR Section 60.4202(a)(2); 40 CFR Section 89.112(a)
Total Particulate Matter: less than or equal to 0.20 grams/kilowatt-hour exhaust emissions from EU 004. Exhaust emissions of total particulate matter are measured using the California Regulations for New 1996 and Later Heavy-Duty Off-Road Diesel Cycle Engines.	40 CFR Section 60.4205(b); 40 CFR Section 60.4202(a)(2); 40 CFR Section 89.112(a)
The Permittee shall operate and maintain EU 004 to achieve the emission standards as required in 40 CFR Section 60.4205 over the entire life of the engine.	40 CFR Section 60.4206
PART 60 SUBPART IIII NSPS OPERATIONAL REQUIREMENTS	hdr
The Permittee shall use diesel fuel that meets the requirements of 40 CFR Section 80.510(b) for nonroad diesel fuel.	40 CFR Section 60.4207(b)
(a) After December 31, 2008, the Permittee may not install stationary CI ICE (excluding fire pump engines) that do not meet the applicable requirements for 2007 model year engines. (b) After December 31, 2009, the Permittee may not install stationary CI ICE with a maximum engine power of less than 19 KW (25 HP) (excluding fire pump engines) that do not meet the applicable requirements for 2008 model year engines. (c) After December 31, 2014, the Permittee may not install non-emergency stationary CI ICE with a maximum engine power of greater than or equal to 19 KW (25 HP) and less than 56 KW (75 HP) that do not meet the applicable requirements for 2013 model year non-emergency engines.	40 CFR Section 60.4208
(d) After December 31, 2013, the Permittee may not install non-emergency stationary CI ICE with a maximum engine power of greater than or equal to 56 KW (75 HP) and less than 130 KW (175 HP) that do not meet the applicable requirements for 2012 model year non-emergency engines. (e) After December 31, 2012, the Permittee may not install non-emergency stationary CI ICE with a maximum engine power of greater than or equal to 130 KW (175 HP), including those above 560 KW (750 HP), that do not meet the applicable requirements for 2011 model year non-emergency engines. (f) After December 31, 2016, the Permittee may not install non-emergency stationary CI ICE with a maximum engine power of greater than or equal to 560 KW (750 HP) that do not meet the applicable requirements for 2015 model year non-emergency engines.	40 CFR Section 60.4208 (cont.)
(g) After December 31, 2018, the Permittee may not install non-emergency stationary CI ICE with a maximum engine power greater than or equal to 600 KW (804 HP) and less than 2,000 KW (2,680 HP) and a displacement of greater than or equal to 10 liters per cylinder and less than 30 liters per cylinder that do not meet the applicable requirements for 2017 model year non-emergency engines. (h) In addition to the requirements specified in 40 CFR Sections 60.4201, 60.4202, 60.4204, and 60.4205, the Permittee is prohibited to import stationary CI ICE with a displacement of less than 30 liters per cylinder that do not meet the applicable requirements specified in 40 CFR Section 60.4208(a) through (g) after the dates specified in 40 CFR Section 60.4208(a) through (g). (i) 40 CFR Section 60.4208 requirements do not apply to stationary CI ICE that have been modified, reconstructed, and do not apply to engines that were removed from one existing location and reinstalled at a new location.	40 CFR Section 60.4208 (cont.)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-19** 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>(a) The Permittee shall do all of the following:</p> <p>(1) Operate and maintain EU 004 and control device according to the manufacturer's emission-related written instructions;</p> <p>(2) Change only those emission-related settings that are permitted by the manufacturer; and</p> <p>(3) Meet the requirements of 40 CFR parts 89, 94 and/or 1068, as they apply to you</p>	40 CFR Section 60.4209; 40 CFR Section 60.4211(a)
The Permittee shall comply with the emission standards specified in 40 CFR Section 60.4205(b) by purchasing an engine certified to the emission standards in 40 CFR Section 60.4205(b) as applicable, for the same model year and maximum engine power. The engine must be installed and configured according to the manufacturer's emission-related specifications.	40 CFR Section 60.4209; 40 CFR Section 60.4211(c)
The Permittee shall operate EU 004 according to the requirements in 40 CFR Section 60.4211(f)(1) through (3). In order for the engine to be considered an emergency stationary ICE under 40 CFR pt. 60, subp. IIII, any operation other than emergency operation, maintenance and testing, emergency demand response, and operation in non-emergency situations for 50 hours per year, as described in 40 CFR Section 60.4211(f)(1) through (3), is prohibited. If EU 004 is not operated according to 40 CFR Section 60.4211(f)(1) through (3) requirements, the engine will not be considered an emergency engine under 40 CFR pt. 60, subp. IIII and must meet all requirements for non-emergency engines.	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)
(1) There is no time limit on the use of emergency stationary ICE in emergency situations.	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(1)
<p>Operating Hours: less than or equal to 100 hours/year for any combination of the purposes specified in 40 CFR Section 60.4211(f)(2)(i) through (iii). Any operation for non-emergency situations as allowed by 40 CFR Section 60.4211(f)(3) counts as part of the 100 hours/year limit.</p> <p>(ii) EU 004 may be operated for emergency demand response for periods in which the Reliability Coordinator under the North American Electric Reliability Corporation (NERC) Reliability Standard EOP-002-3, Capacity and Energy Emergencies (incorporated by reference, see 40 CFR Section 60.17), or other authorized entity as determined by the Reliability Coordinator, has declared an Energy Emergency Alert Level 2 as defined in the NERC Reliability Standard EOP-002-3.</p> <p>(iii) EU 004 may be operated for periods where there is a deviation of voltage or frequency of 5 percent or greater below standard voltage or frequency.</p>	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(2)
(i) EU 004 may be operated for maintenance checks and readiness testing, provided that the tests are recommended by federal, state or local government, the manufacturer, the vendor, the regional transmission organization or equivalent balancing authority and transmission operator, or the insurance company associated with the engine. The Permittee may petition the Administrator for approval of additional hours to be used for maintenance checks and readiness testing, but a petition is not required if the owner or operator maintains records indicating that federal, state, or local standards require maintenance and testing of emergency ICE beyond 100 hours/year.	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(2)(i)
<p>(ii) EU 004 may be operated for emergency demand response for periods in which the Reliability Coordinator under the North American Electric Reliability Corporation (NERC) Reliability Standard EOP-002-3, Capacity and Energy Emergencies (incorporated by reference, see 40 CFR Section 60.17), or other authorized entity as determined by the Reliability Coordinator, has declared an Energy Emergency Alert Level 2 as defined in the NERC Reliability Standard EOP-002-3.</p> <p>(iii) EU 004 may be operated for periods where there is a deviation of voltage or frequency of 5 percent or greater below standard voltage or frequency.</p>	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(2)(ii) and (iii)
Operating Hours: less than or equal to 50 hours/year non-emergency hours of EU 004. The 50 hours of operation in non-emergency situations are counted as part of the 100 hours/year for maintenance and testing and emergency demand response provided in 40 CFR Section 60.4211(f)(2). Except as provided in 40 CFR Section 60.4211(f)(3)(i), the 50 hours per calendar year for non-emergency situations cannot be used for peak shaving or non-emergency demand response, or to generate income for a facility to an electric grid or otherwise supply power as part of a financial arrangement with another entity.	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(3)

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-20**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

<p>The 50 hours per year for non-emergency situations can be used to supply power as part of a financial arrangement with another entity if all of the following conditions are met:</p> <p>(A) The engine is dispatched by the local balancing authority or local transmission and distribution system operator;</p> <p>(B) The dispatch is intended to mitigate local transmission and/or distribution limitations so as to avert potential voltage collapse or line overloads that could lead to the interruption of power supply in a local area or region.</p> <p>(C) The dispatch follows reliability, emergency operation or similar protocols that follow specific NERC, regional, state, public utility commission or local standards or guidelines.</p> <p>(D) The power is provided only to the Permittee or to support the local transmission and distribution system.</p>	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(3)(i)(A) through (D)
<p>(E) The Permittee identifies and records the entity that dispatches the engine and the specific NERC, regional, state, public utility commission or local standards or guidelines that are being followed for dispatching the engine. The local balancing authority or local transmission and distribution system operator may keep these records on behalf of the engine owner or operator.</p>	40 CFR Section 60.4209; 40 CFR Section 60.4211(f)(3)(i)(E)
<p>The Permittee shall install a non-resettable hour meter prior to startup of the engine.</p>	Minn. R. 7007.0800, subp. 2
<p>The Permittee is not required to submit an initial notification. If the emergency engine does not meet the standards applicable to non-emergency engines in the applicable model year in 40 CFR pt. 60, subp. IIII, Table 5 the Permittee shall keep records of the operation of the engine in emergency and non-emergency service that are recorded through the non-resettable hour meter. The owner must record the time of operation of the engine and the reason the engine was in operation during that time.</p>	40 CFR Section 60.4214(b)
<p>EU 004 operates or is contractually obligated to be available for more than 15 hours per calendar year for the purposes specified in 40 CFR Section 60.4211(f)(2)(ii) and (iii), or operates for the purposes specified in 40 CFR Section 60.4211(f)(3)(i), and the Permittee shall submit an annual report according to the requirements below:</p> <p>(1) The report must contain the following information:</p> <p>(i) Company name and address where the engine is located.</p> <p>(ii) Date of the report and beginning and ending dates of the reporting period.</p> <p>(iii) Engine site rating and model year.</p> <p>(iv) Latitude and longitude of the engine in decimal degrees reported to the fifth decimal place.</p> <p>(v) Hours operated for the purposes specified in 40 CFR Section 60.4211(f)(2)(ii) and (iii), including the date, start time, and end time for engine operation for the purposes specified in 40 CFR 60.4211(f)(2)(ii) and (iii).</p>	40 CFR Section 60.4214(d)(1)
<p>(vi) Number of hours the engine is contractually obligated to be available for the purposes specified in 40 CFR Section 60.4211(f)(2)(ii) and (iii).</p> <p>(vii) Hours spent for operation for the purposes specified in 40 CFR Section 60.4211(f)(3)(i), including the date, start time, and end time for engine operation for the purposes specified in 40 CFR Section 60.4211(f)(3)(i). The report must also identify the entity that dispatched the engine and the situation that necessitated the dispatch of the engine</p>	40 CFR Section 60.4214(d)(1) (cont.)
<p>The annual report must be submitted electronically using the subpart specific reporting form in the Compliance and Emissions Data Reporting Interface (CEDRI) that is accessed through EPA's Central Data Exchange (CDX) (www.epa.gov/cdx). However, if the reporting form specific to 40 CFR pt. 60, subp. IIII is not available in CEDRI at the time that the report is due, the written report must be submitted to the Administrator at the appropriate address listed in 40 CFR Section 60.4.</p>	40 CFR Section 60.4214(d)(3)
<p>40 CFR pt. 60, subp. IIII, Table 8 shows which parts of the General Provisions in 40 CFR Sections 60.1 through 60.19 that apply to the Permittee.</p>	40 CFR Section 60.4218

TABLE A: LIMITS AND OTHER REQUIREMENTS

Facility Name: Newport Terminal Corp
Permit Number: 16300010 - 005

Subject Item: CE 001 Flaring

Associated Items: EU 001 Loading Rack 1 - gasoline
GP 002 40 CFR pt. 63, subp. BBBBBB Requirements, Enforcement Not Delegated to MPCA.
MR 001 Temperature reading

What to do	Why to do it
When loading rack emission are vented to the flare, the presence of a flare pilot flame shall be monitored using an ultraviolet sensor or any other equivalent device to detect the presence of a flame. Sensor readings shall be either electronically recorded, manually recorded at 15 minute intervals, or printed on a continuous hard copy readout.	Title I Condition: To avoid classification as major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-22**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Subject Item: CE 002 Vapor Recovery System-Condensers, Hoods, & Other Enclosures**Associated Items:** EU 001 Loading Rack 1 - gasoline

GP 002 40 CFR pt. 63, subp. BBBBBB Requirements, Enforcement Not Delegated to MPCA.

MR 002 VRU CEMS, NDIR Gas Analyzer

What to do	Why to do it
CEMS Installation: Install VRU CEMS (MR 002: VRU CEMS, NDIR Gas Analyzer).	Title I Condition: To avoid classification as major source under 40 CFR Section 52.21 and Minn. R. 7007.3000; To avoid classification as a major source under 40 CFR Section 70.2 and Minn. R. 7007.0200; To avoid major source classification under 40 CFR Section 63.2; Minn. R. 7007.0800, subps. 4 and 5
When loading rack emissions are vented to the VRU, VOCs shall be monitored using continuous emissions monitoring system (CEMS). Emissions shall be either electronically recorded, manually recorded at 15 minute intervals, or printed on a continuous hard copy readout.	Minn. R. 7007.0800, subps. 4 & 5
Install, calibrate, certify, operate, and maintain, according to the manufacturer's specifications, a continuous emissions monitoring system (CEMS) capable of measuring organic compound concentration in the exhaust air stream.	Minn. R. 7007.0800, subps. 4 & 5
CEMS Monitor Design: Each CEMS shall be designed to complete a minimum of one cycle of sampling, analyzing, and data recording in each 15-minute period.	40 CFR Section 63.8(c)(4)(ii); Minn. R. 7017.1040, subp. 1
CEM Certification Test: due 120 days after Initial Startup. (This requirement is as stringent as that of Minn. R. 7017.1050, subp. 1 requiring testing within 90 days after the due date of the first excess emissions report required for the CEMS or COMS.)	Minn. R. 7017.1040, subp. 1
CEMS Certification Test Plan: due 60 days before CEMS Certification Test.	40 CFR Section 63.8(e)(2); Minn. R. 7017.1060, subps. 1 & 2
CEMS Certification Test Pretest Meeting: due 7 days before CEMS Certification Test.	Minn. R. 7017.1060, subp. 3
CEMS Certification Test Report: due 45 days after CEMS Certification Test	40 CFR Section 63.8(e)(5); Minn. R. 7017.1080, subps. 1, 2, & 4
CEMS Certification Test Report - Microfiche or CD Copy: due 105 days after CEMS Certification Test.	Minn. R. 7017.1080, subp. 3
Continuous Operation: CEMS must be operated and data recorded during all periods of emission unit operation including periods of emission unit start-up, shutdown, or malfunction except for periods of acceptable monitor downtime. This requirement applies whether or not a numerical emission limit applies during these periods. A CEMS must not be bypassed except in emergencies where failure to bypass would endanger human health, safety, or plant equipment.	40 CFR Section 63.8(b)(4); Minn. R. 7017.1090, subp. 1
QA Plan: Develop and implement a written quality assurance plan that covers each CEMS. The plan shall be on site and available for inspection within 30 days after monitor certification. The plan shall contain all of the information required by 40 CFR pt. 60, Appendix F, Section 3.	Minn. R. 7017.1170, subp. 2; 40 CFR pt. 60, App. F; section 3
Cylinder Gas Audit: due 30 days after end of each calendar half-year following CEM Certification Test, except that a CGA is not required during any calendar half year in which a RATA was performed. The initial CGA must be performed within 180 days following certification of the CEMS. The CGAs shall be conducted at least three months apart but no more than eight months apart. A CGA shall be conducted according to the procedures in 40 CFR pt. 60, Appendix F, section 5.1.2. If the monitored emission unit was operated for less than 24 hours during the calendar half year, a CGA is not required for that calendar half year.	40 CFR pt. 60, Appendix F, section 5.1.2; Minn. R. 7017.1170, subp. 4
CEMS Relative Accuracy Test Audit (RATA): due before end of each calendar year following Permit Issuance. A RATA is not required in any calendar year if a RATA conducted in the previous year demonstrated a relative accuracy value of less than 15 percent or if the associated emissions unit operated less than 48 hours during the calendar year. If the exception is used, the next RATA shall be conducted during the first half of the following calendar year. RATAs shall be conducted at least 3 months apart according to 40 CFR pt. 60, Appendix F, section 5.1.1.	Minn. R. 7017.1170, subp. 5
Cylinder Gas Audit (CGA) Results Summary: due 30 days after end of each calendar quarter following Cylinder Gas Audit (CGA).	Minn. R. 7017.1180, subp.1
Relative Accuracy Test Audit (RATA) Notification: due 30 days before CEMS Relative Accuracy Test Audit (RATA)) .	Minn. R. 7017.1180, subp. 2

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-23**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Recordkeeping: The owner or operator must retain records of all CEMS monitoring data and support information for a period of five years from the date of the monitoring sample, measurement or report. Records shall be kept at the source.	40 CFR Section 63.10(b)(1); Minn. R. 7017.1130
Monitoring Data: Reduce all VRU CEMS, NDIR Gas Analyzer data to 1-hour averages, in accordance with 40 CFR Section 63.8(g)(2) and Minn. R. 7011.1160. 1-hour averages shall be computed from four or more data points equally spaced over each 1-hour period.	40 CFR Section 63.8(g)(2) regarding continuous monitoring systems other than COMS; Minn. R. 7011.1160

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-24**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Subject Item: FS 001 Valves, Flanges, & Seals

What to do	Why to do it
The Permittee shall keep an updated record of the FS 001 inventory. The inventory shall state the number of valves, flanges, and pump seals. As of May 2008 there were 152 valves, 686 flanges, and 17 pump seals.	Title I Condition: to avoid classification as major source under 40 CFR Section 52.21 and 40 CFR Section 63.2; Minn. R. 7007.3000; Minn. R. 7007.0800, subp. 2 to avoid major source classification under section 70.2; Minn. R. 7007.0800, subp. 4 & 5
Fugitive Emissions Calculations: By the 15th day of each month, calculate and record fugitive VOC emissions from the previous month as follows: $FE = T \cdot U + V \cdot W + X \cdot Y$ where: FE = fugitive emissions, lb/month T = total valve count U = valve emission factor, $6.92 \cdot 10^{-2}$ lb/month/valve V = total flange count W = flange emission factor, $1.29 \cdot 10^{-2}$ lb/month/flange X = total pump seal count Y = pump seal emission factor, $8.68 \cdot 10^{-1}$ lb/month/seal	Title I Condition: to avoid classification as major source under 40 CFR Section 52.21 and 40 CFR Section 63.2; Minn. R. 7007.3000; Minn. R. 7007.0800, subp. 2 to avoid major source classification under section 70.2; Minn. R. 7007.0800, subp. 4 & 5

TABLE A: LIMITS AND OTHER REQUIREMENTS**A-25**

04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

Subject Item: FS 002 Tanker Purging

What to do	Why to do it
<p>Recordkeeping - Tanker Purging:</p> <p>By the 15th day of each month the Permittee shall calculate and record the following:</p> <ol style="list-style-type: none">1. total number of 8500 gallon cargo tankers purged during the previous calendar month;2. monthly purging emissions from the previous calendar month as follows: <p>$TP = Z \cdot AA \cdot 8500$</p> <p>where:</p> <p>TP = tanker purging emissions, lb/month Z = purging emission factor, 0.00815 lb/gallon gasoline AA = total number of 8500 gallon tanker purged during the previous month</p>	<p>Title I Condition: to avoid classification as major source under 40 CFR Section 52.21 and 40 CFR Section 63.2; Minn. R. 7007.3000;</p> <p>Minn. R. 7007.0800, subp. 2 to avoid major source classification under section 70.2; Minn. R. 7007.0800, subp. 4 & 5</p>

TABLE B: SUBMITTALS

B-1 04/02/13

Facility Name: Newport Terminal Corp
Permit Number: 16300010 - 005

Each submittal must be postmarked or received by the date specified in the applicable Table. Those submittals required by parts 7007.0100 to 7007.1850 must be certified by a responsible official, defined in Minn. R. 7007.0100, subp. 21. Other submittals shall be certified as appropriate if certification is required by an applicable rule or permit condition.

Send submittals that are required to be submitted to the U.S. EPA regional office to:

Chief Air Enforcement
Air and Radiation Branch
EPA Region V
77 West Jackson Boulevard
Chicago, Illinois 60604

Table B lists most of the submittals required by this permit. Please note that some submittal requirements may appear in Table A or, if applicable, within a compliance schedule located in Table C. Table B is divided into two sections in order to separately list one-time only and recurrent submittal requirements.

Send submittals that are required by the Acid Rain Program to:

U.S. Environmental Protection Agency
Clean Air Markets Division
1200 Pennsylvania Avenue NW (6204N)
Washington, D.C. 20460

Send any application for a permit or permit amendment to:

Fiscal Services
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155-4194

Also, where required by an applicable rule or permit condition, send to the Permit Document Coordinator notices of:

- accumulated insignificant activities,
- installation of control equipment,
- replacement of an emissions unit, and
- changes that contravene a permit term.

Unless another person is identified in the applicable Table, send all other submittals to:

AQ Compliance Tracking Coordinator
Industrial Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155-4194

TABLE B: ONE TIME SUBMITTALS OR NOTIFICATIONS**B-2** 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

What to send	When to send	Portion of Facility Affected
Notification	due 60 days before Install of the continuous emissions monitoring system. The notification shall include plans and drawings of the system.	CE002
Testing Frequency Plan	due 60 days after Performance Test for VOC emissions. The plan shall specify a testing frequency based on the test results and MPCA guidance. Future performance tests at 12-month, 36-month, or 60-month intervals, or as applicable, shall be required upon written approval of the plan by the MPCA.	EU001

TABLE B: RECURRENT SUBMITTALS**B-3** 04/02/13

Facility Name: Newport Terminal Corp

Permit Number: 16300010 - 005

What to send	When to send	Portion of Facility Affected
Excess Emissions/Downtime Reports (EER's)	due 30 days after end of each calendar quarter following Initial Startup of the Monitor The EER shall indicate all periods of monitor bypass and all periods of exceedances of the limit including exceedances allowed by an applicable standard, i.e. during startup, shutdown, and malfunctions.	CE002
Relative Accuracy Test Audit (RATA) Results Summary	due 30 days after end of each calendar quarter following permit issuance in which a RATA was conducted.	CE002
Semiannual Deviations Report	due 30 days after end of each calendar half-year following Permit Issuance. The first semiannual report submitted by the Permittee shall cover the calendar half-year in which the permit is issued. The first report of each calendar year covers January 1 - June 30. The second report of each calendar year covers July 1 - December 31. If no deviations have occurred, the Permittee shall submit the report stating no deviations.	Total Facility
Annual Report	due before end of each calendar year starting 03/31/2016. The first annual report must cover the calendar year 2015 and must be submitted no later than March 31, 2016. Subsequent annual reports for each calendar year must be submitted no later than March 31 of the following calendar year.	EU004
Compliance Certification	due 31 days after end of each calendar year following Permit Issuance (for the previous calendar year). The Permittee shall submit this to the Commissioner on a form approved by the Commissioner. This report covers all deviations experienced during the calendar year.	Total Facility

APPENDIX MATERIAL

Facility Name: Newport Terminal Corp

Permit Number: 16300010-005

APPENDIX I

EU 001 LOADING RACK 1 VOC EMISSION CALCULATION EQUATION

$$E = K \sum_{i=1}^n (V_{esi} C_{ei}) / (L 10^6)$$

where:

E=emission rate of total organic compounds, mg/liter of gasoline loaded.

V_{esi}=volume of air-vapor mixture exhausted at each interval "i", scm.

C_{ei}=concentration of total organic compounds at each interval "i", ppm.

L=total volume of gasoline loaded, liters.

n=number of testing intervals.

i=emission testing interval of 5 minutes.

K=density of calibration gas, 1.83×10⁶ for propane and 2.41×10⁶ for butane, mg/scm.

APPENDIX II

INSIGNIFICANT ACTIVITIES REQUIRED TO BE LISTED

The table below lists the insignificant activities that are currently at the facility and the associated general applicable requirements.

Minn. R. 7007.1300, subp.	Rule Description of the Activity	General Applicable Requirement
3(E)(2)	775-gallon diesel fuel storage tank. <i>This storage tank is well below the capacity limit of 10,000 gallons for a non-hazardous air pollutant VOC storage tank and is highly unlikely to violate the applicable requirement.</i>	Minn. R. 7011.0715
4(B)	Potential emissions of 2.28 pounds per hour or actual emissions of one ton per year for particulate matter, particulate matter less than ten microns, nitrogen oxide, sulfur dioxide, and VOCs. <i>The facility has 2 storage tanks and loading rack 2 that are insignificant sources. The combined PTE of these two tanks is less than 2 tpy of VOCs.</i>	none

Under Minn. R. 7007.1250, subp. 1(A), the Permittee may add insignificant activities to the stationary source throughout the term of the permit without getting permit amendments. Certain exclusions apply and are listed in Minn. R. 7007.1250, subp. 2. In addition, this permit specifically prohibits the Permittee from making any modifications that would make the source major under NSR. The following table is a list of insignificant activities that the Permittee may likely to add and the associated applicable requirements.

Minn. R. 7007.1300, subp.	Rule Description of the Activity	General Applicable Requirement
3(A)	Fuel use: space heaters fueled by, kerosene, natural gas, or propane.	Minn. R. 7011.0510/0515
3(H)	Miscellaneous:	
	(2) equipment used for hydraulic or hydrostatic testing;	Minn. R. 7011.0710/0715
	(3) brazing, soldering or welding equipment;	Minn. R. 7011.0510/0515, Minn. R. 7011.0610 and Minn. R. 7011.0710/0715 (PM and opacity)
	(4) blueprint copiers and photographic processes;	Minn. R. 7011.0105/0110 (opacity)
	(7) cleaning operations: alkaline/phosphate cleaners and associated cleaners and associated burners.	Minn. R. 7011.0510/0515, Minn. R. 7011.0610 and Minn. R. 7011.0710/0715 (PM and opacity)
3(J)	Fugitive Emissions from roads and parking lots.	Minn. R. 7011.0150 (PM)

3(K)	Infrequent use of spray paint equipment for routine housekeeping or plant upkeep activities not associated with primary production processes at the stationary source.	Minn. R. 7011.0710/0715 (VOC)
------	--	-------------------------------
