

Enbridge Line 3 MPCA Application Processing Schedule – 03/1/2019

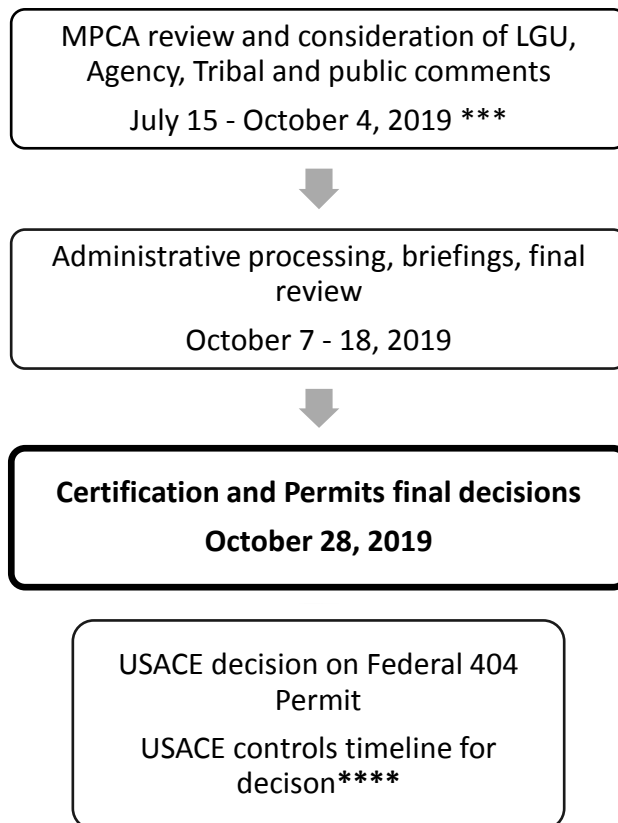

Blue highlight – Tribal Review or consultation

Green highlight – LGU, agency, or public review/engagement

*The General Stormwater Permit application is expected to be submitted to MPCA later in 2019. Upon submittal of a complete application and approval of the SWPPP by MPCA, the permit becomes effective 30 days thereafter.

** Timeline for review is dependent on Enbridge’s timely submission of all necessary information required by the MPCA throughout the process. In addition, if additional regulatory considerations are incorporated into the review, the review timeline will increase.

*** Timeline for MPCA review of public comments is dependent upon the number and complexity of comments received.

**** The USACE typically takes months to render a decision on section 404 permits, and MPCA has no control over this process.
