State Disposal System
MN0023141

Permittee: City of Dalton
Facility name: Dalton Wastewater Treatment Facility
Township: Tumuli  County: Otter Tail

Issuance date: 
Expiration date: 

The state of Minnesota, on behalf of its citizens through the Minnesota Pollution Control Agency (MPCA), authorizes the Permittee to operate a disposal system at the facility named above in accordance with the requirements of this permit.

The goal of this permit is to reduce pollutant levels in point source discharges and protect water quality in accordance with the U.S. Clean Water Act, Minnesota statutes and rules, and federal laws and regulations.

This permit is effective on the issuance date identified above. This permit expires at midnight on the expiration date identified above.

1. Permitted facility description

The Dalton Wastewater Treatment Facility (Facility) is located at 15076 Dalton Rd, Dalton, Minnesota 56324, Otter Tail County.

Major components of the Facility include:
- Effluent Disposal - agricultural spray irrigation
- Primary treatment - primary stabilization pond
- Secondary Stabilization Pond

The existing Facility is a Class D Facility and consists of two lift stations, an auxiliary pumping station, 1,220 feet of 6-inch force main, a three-cell stabilization pond system, spray irrigation piping and pumps, and a 55-acre spray irrigation field with a center pivot irrigation rig.

The Facility is designed to treat an average wet weather flow of 46,390 gallons per day with a 5-day carbonaceous biochemical oxygen demand strength of 170 milligrams per liter. The pond system consists of two primary ponds (0.7 acres and 2.3 acres at mean operating depth) and one secondary pond (3.9 acres at mean operating depth) and has a total detention time of approximately 221 days at design flow. Treated wastewater is discharged from the secondary pond to the spray irrigation site during the growing season.

There is a drain tile system associated with the spray irrigation site. The Permittee has installed a 60 degree v-notch weir to measure flow from the drain tile discharge. The Limits and Monitoring Section of this permit lists the monitoring requirements of the drain tile discharge.

There are no bypass or overflow points known to exist in this treatment system.

Changes made this reissuance:
The Permittee intends to perform the following work in 2017: dredging primary pond #1, replace the primary pond control and transfer structures and piping, add riprap to the primary ponds, modify the access to the secondary pond, and stabilize the spray irrigator wheel tracks. The project is described in greater detail in the construction schedule section of this permit.

The Facility is further described in plans and specifications prepared by the firm of Ulteig Engineers, Inc., Detroit Lakes, Minnesota. These are also on file at the Minnesota Pollution Control Agency, St. Paul Office.

<td></td>
<td></td>
</tr>
</tbody>
</table>
i. A plan for final sampling and analysis of biosolids;
ii. A plan for determining the final quantity of biosolids to be disposed.
iii. If biosolids will be land applied, the plan shall include:
   1. A schedule to employ a Type IV Operator to manage the land application activities;
   2. A determination of how much land will be needed based on nitrogen application rates;
   3. A description of how pathogen and vector attraction reduction requirements will be met;
   4. Land Application site approval applications shall be submitted as part of the plans and specifications;
   c. A description of the final disposal of all facility structures including buildings, tanks, ponds, pipes, equipment, etc.
d. Description of the final use of the existing site and any retained structures;
e. A schedule for completion of all cleanout activities.
f. A detailed description of the work required to be completed for decommissioning or relining a wastewater pond facility can be found on the MPCA web site at: http://www.pca.state.mn.us/index.php/view-document.html?gid=14958
   i. Preliminary Assessment and Characterization
      1. Estimate of the volume of biosolids on both a liquid and dry ton basis.
      2. Sampling plan to determine the chemical characteristics.
   ii. Methods to be used to collect samples to estimate the quantity of biosolids on both a liquid and dry tons basis
   iii. Biosolids characterization sampling plan. Biosolids sampling shall be conducted to establish the general quality of the material. A minimum of one sample per six acres of pond area shall be taken. For ponds less than six acres, at least two composite samples shall be taken.
      iv. Each composite sample shall be composed of a minimum of ten sub-samples.
      v. The sub-samples shall be taken from the biosolids layer only.
      vi. Composite samples shall be analyzed for total solids, volatile solids, Kjeldahl nitrogen, ammonia nitrogen, arsenic, cadmium, copper, lead, mercury, molybdenum, nickel, selenium, zinc, and PCB’s. Samples from secondary ponds, or ponds built after 1984 do not require PCB analysis.
      vii. A description of how the ponds will be dewatered;
   viii. A description of how the biosolids will be removed from the pond. [Minn. R. 7001]
5.7.20 Submit Verification of Certified Operator and O&M Manual. The Permittee shall notify the MPCA in writing at least 60 days before the planned initiation of operation of the new or upgraded facility that it has employed a wastewater treatment facility operator, certified for the classification of the treatment system (according to Minn. R., Chapter 9400), that is directly responsible for the operation of the system. The Permittee shall also submit an operation and maintenance (O&M) manual or a maintenance plan; or a certificate of completion of an operation and maintenance manual. [Minn. R. 7001]

5.7.21 Submit Initiation of Operation Date. The Permittee shall notify the MPCA in writing within 14 days after the actual initiation of operation date. The Permittee shall comply with all permit requirements and attain final limits within 90 days of the Initiation of Operation date. [Minn. R. 7001]

5.7.22 Submit Notice to Complete Construction. The Permittee shall notify the MPCA in writing at least 14 days before the planned completion of construction date. The MPCA may complete a final inspection. [Minn. R. 7001]

5.7.23 Submit Final Technical Documents. The Permittee shall submit final technical documents to the MPCA within one year after the initiation of operation date. [Minn. R. 7001]

Spray Irrigation

5.8.24 Authorization. [Minn. R. 7001]

5.8.25 This chapter authorizes the Permittee to apply treated wastewater, as described in the 'Facility Description' section of this permit, to land application sites using a spray irrigation system. This activity is limited by the 'Limits and Monitoring' section of this permit, as well as the other terms and conditions of this permit. [Minn. R. 7001.0150, 3(E)]

5.8.26 Wastewater Land Application System Management. [Minn. R. 7001]

5.8.27 The wastewater flow to a land application site shall not have physical or chemical characteristics that prevent the proper operation of the land disposal system. The wastewater shall be free of material that interferes with the operation of nozzles, orifices or flow measurement devices. [Minn. R. 7001.0150, 3(F)]

5.8.28 Wastewater shall be applied so as not to harm vegetation and so that prolonged saturated soil conditions do not develop due to the application. Wastewater shall not be applied during precipitation periods. [Minn. R. 7001.0150, 3(F)]

5.8.29 A permanent vegetative cover shall be maintained on the spray irrigation site during the entire application season, such as a legume hay (e.g. alfalfa), grass hay (e.g. bromegrass, reed canary grass), or a legume/grass mix for a minimum of four out of every five years. An annual row crop, such as corn or soybeans, may be grown in one year out of every five. [Minn. R. 7001.0150, 3(F)]

5.8.30 Wastewater shall not be applied after the cover crop has become dormant as a result of frost or below freezing temperatures. [Minn. R. 7001.0150, 3(F)]

5.8.31 The Permittee shall prevent the surface runoff of wastewater, and precipitation runoff mixed with wastewater, from the land application site(s). The Permittee shall provide runoff collection and re-application systems as appropriate to prevent the discharge of surface runoff. [Minn. R. 7001.0150, 3(F)]

5.8.32 If odor or aerosol drift resulting from operation of the wastewater disposal system creates a nuisance condition, the Permittee shall immediately take appropriate action to control or abate the odor or aerosol drift. The Permittee shall notify the MPCA of a nuisance condition within five (5) days of discovery. [Minn. R. 7001.0150, 3(F)]

5.8.33 Tile inlets shall be capped during spray irrigation events. [Minn. R. 7001.0150, 3(F)]

5.8.34 Best management practices shall be utilized for all crops. The Permittee shall utilize the facility’s Operation and Maintenance Manual, the Sprayfield Management Plan, and the most recent recommendations of the Minnesota Extension Service, University of Minnesota, for managing nitrogen for crop production on irrigated soils. Soil test results shall also be utilized for fertilizer recommendations. [Minn. R. 7001.0150, 3(F)]

5.8.35 If any changes are made to the facilities permitted spray irrigation site the Permittee is required to notify the MPCA and update the facilities sprayfield management plan. This plan shall be kept on-site and made available upon MPCA request. [Minn. R. 7001.0150, 3(F)]
5.8.36 Spray Irrigation Outside of Acceptable Land Application Periods. [Minn. R. 7001]

5.8.37 If conditions require spray irrigation outside of the effective period designated in the limits and monitoring section of this permit or if an emergency condition exists, the Permittee shall submit to the MPCA the "Spray Irrigation/Rapid Infiltration Basin Discharge Not Authorized Within Permit" form found on the MPCA's website at: http://www.pca.state.mn.us/index.php/water/water-types-and-programs/wastewater/index.html. The form shall be submitted to the MPCA at least two weeks prior to needing to spray irrigate. [Minn. R. 7001.0150, 3(F)]

5.8.38 Reporting. [Minn. R. 7001]

5.8.39 The Permittee shall submit a land application of wastewater annual report: Due by January 21 of each year following permit issuance. [Minn. R. 7001.0150, 3(F)]

5.8.40 The Land Application of Wastewater Annual Report shall include the following information:

a. A description of the treatment system, including any changes made during the year.

b. A description of system operation during the past year, including the following:
   i. nutrient and hydraulic loading;
   ii. irrigation scheduling and intensity;
   iii. crop harvesting; and
   iv. problems encountered and any remedial actions.

c. A description of system maintenance during the past year, including the following:
   i. crop types and yields; and
   ii. irrigation equipment.

d. A summarization of monitoring results obtained during the past year from the soil monitoring requirements.

e. An analysis of the information submitted, and recommendations for changes, including the following:
   i. analysis of the year's operation; and
   ii. proposed changes for the coming year's operation. [Minn. R. 7001.0150, 3(F)]

5.9.41 Spray Irrigation: Soils

5.9.42 Sampling Location. [Minn. R. 7001]

5.9.43 Soil Samples. [Minn. R. 7001]

5.9.44 Soil samples shall be taken in the spring before the first irrigation and before the first application of commercial or other supplemental fertilizer for that year. [Minn. R. 7001.0150, 2(B)]

5.9.45 Soil samples shall be a composite of a mixture of 15 to 20 equally proportioned subsamples taken from a 0- to 8-inch core. At least one composite sample shall be collected for each 40 acres on the permitted land application site. [Minn. R. 7001.0150, 2(B)]

5.9.46 Application Rates. [Minn. R. 7001]

5.9.47 Nitrogen and sodium land application rate limits apply to the sum of all sources of nitrogen or sodium applied to a permitted application site. [Minn. R. 7001.0150, 3(F)]

5.9.48 If nitrogen or sodium are applied to a permitted land application site from other sources including commercial fertilizer, manure, silage, sewage or wastewater treatment solids and sludges, then these other nitrogen or sodium sources shall be included in the sum of nitrogen or sodium applied to determine compliance with application rate limits at that site. [Minn. R. 7001.0150, 3(F)]

5.9.49 The nitrogen application rate shall be calculated as the sum of the total annual mass Kjeldahl nitrogen and nitrate-plus-nitrite nitrogen applied to the site, divided by the acreage of the site. [Minn. R. 7001.0150, 3(F)]

5.10.50 Bypass Structures. [Minn. R. 7001]

5.10.51 All structures capable of bypassing the treatment system shall be manually controlled and kept locked at all times. [Minn. R. 7001.0150, 3(F)]
5.10.52 Sanitary Sewer Extension Permit. [Minn. R. 7001]

5.10.53 The Permittee may be required to obtain a Sanitary Sewer Extension Permit from the MPCA for any addition, extension or replacement to the sanitary sewer. If a sewer extension permit is required, construction may not begin until plans and specifications have been submitted and a written permit is granted except as allowed in Minn. Stat. 115.07, Subd. 3(b). [Minn. R. 7001.0150, 3(F)]

5.10.54 Operator Certification. [Minn. R. 7001]

5.10.55 The Permittee shall provide a Class D state certified operator who is in direct responsible charge of the operation, maintenance and testing functions required to ensure compliance with the terms and conditions of this permit. [Minn. R. 9400.0400, 1(A)]

5.10.56 If the Permittee chooses to meet operator certification requirements through a contractual agreement, the Permittee shall provide a copy of the contract to the MPCA, WQ Submittals Center. The contract shall include the certified operator's name, certificate number, company name if appropriate, the period covered by the contract and provisions for renewal; the duties and responsibilities of the certified operator; the duties and responsibilities of the permittee; and provisions for notifying the MPCA 30 days in advance of termination if the contract is terminated prior to the expiration date. [Minn. R. 9400.0400, 1(A)]

5.10.57 The Permittee shall notify the MPCA within 30 days of a change in operator certification or contract status. [Minn. R. 7001.0150, 3(F)]

5.10.58 Ponds - Acceptable Discharge Periods. [Minn. R. 7001]

5.10.59 The acceptable discharge period to the spray irrigation site is from April through November, as indicated in the limits and monitoring section. There shall be no unauthorized discharge to surface water from this facility. [Minn. R. 7001.0150, 3(F)]

5.10.60 Ponds - Observations. [Minn. R. 7001]

5.10.61 The Permittee shall inspect the pond system weekly, and shall take measurements of pond water depth, estimate the coverage of aquatic plants, floating mats and ice cover on the surface of the ponds, and note odors, the condition of the dikes and the presence of muskrats. The Permittee shall maintain records of these weekly inspections for the last three (3) years, and submit the results on the Discharge Monitoring Report (DMR) supplemental form. [Minn. R. 7001.0150, 3(F)]

5.10.62 The Permittee shall maintain daily precipitation records. [Minn. R. 7001.0150, 3(F)]

Pretreatment: Undelegated Requirements

5.11.63 Pretreatment - Definitions. [Minn. R. 7049]

5.11.64 An "Individual Control Mechanism" is a document, such as an agreement or permit, that imposes limitations or requirements on an individual industrial user of the POTW. [Minn. R. 7049]

5.11.65 "Significant Industrial User" (SIU) means any industrial user that:

a. discharges 25,000 gallons per day or more of process wastewater;
b. contributes a load of five (5) % or more of the capacity of the POTW; or
c. is designated as significant by the Permittee or the MPCA on the basis that the SIU has a reasonable potential to adversely impact the POTW, or the quality of its effluent or residuals. [Minn. R. 7049]

5.11.66 Pretreatment - Permittee Responsibility to Control Users. [Minn. R. 7049]

5.11.67 It is the Permittee's responsibility to regulate the discharge from users of its wastewater treatment facility. The Permittee shall prevent any pass through of pollutants or any inhibition or disruption of the Permittee's facility, its treatment processes, or its sludge processes or disposal that contribute to the violation of the conditions of this permit or any federal or state law or regulation limiting the release of pollutants from the POTW. [Minn. R. 7049]

5.11.68 The Permittee shall prohibit the discharge of the following to its wastewater treatment facility:

a. pollutants which create a fire or explosion hazard, including any discharge with a flash point less than 60 degrees C (140 degrees F);
b. pollutants which would cause corrosive structural damage to the POTW, including any waste stream with a pH of less than 5.0;
c. solid or viscous pollutants which would obstruct flow;
d. heat that would inhibit biological activity, including any discharge that would cause the
temperature of the waste stream at the POTW treatment plant headwork's to exceed 40 degrees C
(104 degrees F);
e. pollutants which produce toxic gases, vapors, or fumes that may endanger the health or safety of
workers; or
f. any pollutant, including oxygen demanding pollutants such as biochemical oxygen demand,
released at a flow rate or pollutant concentration that will cause interference or pass through.

[5.11.69] The Permittee shall prohibit new discharges of non-contact cooling waters unless there is no cost
effective alternative. Existing discharges of non-contact cooling water to the Permittee’s wastewater
treatment facility shall be eliminated, where elimination is cost-effective, or where an
infiltration/inflow analysis and sewer system evaluation survey indicates the need for such removal.
[5.11.70] If the Permittee accepts trucked-in wastes, the Permittee shall evaluate the trucked in wastes prior
to acceptance in the same manner as it monitors sewered wastes. The Permittee shall accept
trucked-in wastes only at specifically designated points.

[5.11.71] Pollutant of concern means a pollutant that is or may be discharged by an industrial user that is, or
reasonably should be of concern on the basis that it may cause the permittee to violate any permit
limits on the release of pollutants. The following pollutants shall be evaluated to determine if they
should be pollutants of concern: pollutants limited in this permit, pollutants for which monitoring is
required in this permit, pollutants that are likely to cause inhibition of the Permittee’s POTW,
pollutants which may interfere with sludge disposal, and pollutants for which the Permittee’s
treatment facility has limited capacity.

[5.11.72] Control of Significant Industrial Users.

[5.11.73] The Permittee shall impose pretreatment requirements on SIUs which will ensure compliance with
all applicable effluent limitations and other requirements set forth in this permit or any federal or
state law or regulation limiting the release of pollutants from the POTW. These requirements shall be
applied to SIUs by means of an individual control mechanism.

[5.11.74] The Permittee shall not knowingly enter into an individual control mechanism with any user that
would allow the user to contribute an amount or strength of wastewater that would cause violation
of any limitation or requirement in the permit, or any applicable federal, state or local law or
regulation.

[5.11.75] Monitoring of Significant Industrial Users.

[5.11.76] The Permittee shall obtain from SIUs specific information on the quality and quantity of the SIU's
discharges to the Permittee's POTW. Except where specifically requested by the Permittee and
approved by the MPCA, this information shall be obtained by means of representative monitoring
conducted by the Permittee or by the SIU under requirements imposed by the Permittee in the SIU's
individual control mechanism. Monitoring performed to comply with this requirement shall include
all pollutants for which the SIU is significant and shall be done at a frequency commensurate with
the significance of the SIU.

[5.11.77] Reporting and Notification.

[5.11.78] The Permittee shall submit a pretreatment annual report: Due by 31 days after the end of each
calendar year following permit issuance if a SIU discharges to the POTW during a given calendar year.

[5.11.79] The Pretreatment Annual Report shall be submitted on forms provided by the agency or shall
provide equivalent information.

The Permittee shall submit the pre-treatment report to the following address:

MPCA
Attn: WQ Submittals Center
520 Lafayette Road North
St. Paul, Minnesota 55155-4194.
5.11.80 The Permittee shall notify the MPCA in writing of any:

a. SIU of the Permittee’s POTW which has not been previously disclosed to the MPCA;
b. anticipated or actual changes in the volume or quality of discharge by an industrial user that could result in the industrial user becoming an SIU as defined in this chapter; or
c. anticipated or actual changes in the volume or quality of discharges by a SIU that would require changes to the SIU’s required local limits.

This notification shall be submitted within 30 days of identifying the IU as a SIU. Where changes are proposed, they shall be submitted prior to changes being made. [Minn. R. 7049]

5.11.81 Upon notifying the MPCA of a SIU or change in a SIU discharge as required above, the Permittee shall submit the following information on forms provided by the agency or in a comparable format:

a. the identity of the SIU and a description of the SIU’s operation and process;
b. a characterization of the SIU’s discharge;
c. the required local limits that will be imposed on the SIU;
d. a technical justification of the required local limits; and

e. a plan for monitoring the SIU which is consistent with monitoring requirements in this chapter. [Minn. R. 7049]

5.11.82 In addition, the Permittee shall, upon request, submit the following to the MPCA for approval:

a. additional information on the SIU, its processes and discharge;
b. a copy of the individual control mechanism used to control the SIU;
c. the Permittee’s legal authority to be used for regulating the SIU; and

d. the Permittee’s procedures for enforcing the requirements imposed on the SIU. [Minn. R. 7049]

5.11.83 The permittee shall notify MPCA of any of its industrial users that may be subject to national categorical pretreatment standards. [Minn. R. 7049]

5.11.84 This permit may be modified in accordance with Minnesota Rules, ch. 7001 to require development of a pretreatment program approvable under the Federal General Pretreatment Regulation (40 CFR 403). [Minn. R. 7049]

5.12.85 No Discharge. There shall be no point source discharge to surface water from the permitted activity. [Minn. R. 7001]

5.12.86 Definitions. Refer to the ‘Permit Users Manual’ found on the MPCA website (www.pca.state.mn.us) for standard definitions. [Minn. R. 7001]

5.12.87 Incorporation by Reference. The following applicable federal and state laws are incorporated by reference in this permit, are applicable to the Permittee, and are enforceable parts of this permit: 40 CFR pts. 122.41, 122.42, 136, 403 and 503; Minn. R. pts. 7001, 7041, 7045, 7050, 7052, 7053, 7060, and 7080; and Minn. Stat. ch. 115 and 116. [Minn. R. 7001]

5.12.88 Permittee Responsibility. The Permittee shall perform the actions or conduct the activity authorized by the permit in compliance with the conditions of the permit and, if required, in accordance with the plans and specifications approved by the Agency. [Minn. R. 7001.0150, subp. 3(E)]

5.12.89 Toxic Discharges Prohibited. Whether or not this permit includes effluent limitations for toxic pollutants, the Permittee shall not discharge a toxic pollutant except according to Code of Federal Regulations, Title 40, sections 400 to 460 and Minnesota Rules 7050, 7052, 7053 and any other applicable MPCA rules. [Minn. R. 7001.1090, subp. 1(A)]

5.12.90 Nuisance Conditions Prohibited. The Permittee’s discharge shall not cause any nuisance conditions including, but not limited to: floating solids, scum and visible oil film, acutely toxic conditions to aquatic life, or other adverse impact on the receiving water. [Minn. R. 7050.0210, subp. 2]

5.12.91 Property Rights. This permit does not convey a property right or an exclusive privilege. [Minn. R. 7001.0150, subp. 3(C)]

5.12.92 Liability Exemption. In issuing this permit, the state and the MPCA assume no responsibility for damage to persons, property, or the environment caused by the activities of the Permittee in the

</tbody>
</table>
include the following information:

a. the exact place, date, and time of the sample or measurement;
b. the date of analysis;
c. the name of the person who performed the sample collection, measurement, analysis, or calculation;
d. the analytical techniques, procedures and methods used; and
e. the results of the analysis. [Minn. R. 7001.0150, 2(C)]

| 5.12.107 | Completing Reports. The Permittee shall submit the results of the required sampling and monitoring activities on the forms provided, specified, or approved by the MPCA. The information shall be recorded in the specified areas on those forms and in the units specified. Required forms may include DMR Supplemental/Sample Value Form Individual values for each sample and measurement shall be recorded on the DMR Supplemental/Sample Value Form which, if required, will be provided by the MPCA. DMR Supplemental/Sample Value Forms shall be submitted with the appropriate DMRs. You may design and use your own supplemental form; however it shall be approved by the MPCA. Note: Required summary information shall also be recorded on the DMR. Summary information that is submitted ONLY on the DMR Supplemental/Sample Value Form does not comply with the reporting requirements. [Minn. R. 7001.1090, 1(D), Minn. R. 7001.150, 2(B)] |

| 5.12.108 | Submitting Reports. DMRs, DMR supplemental forms and related attachments must be electronically submitted via the MPCA Online Services Portal after authorization is approved. DMRs and DMR Supplemental Forms shall be electronically submitted by the 21st day of the month following the sampling period or as otherwise specified in this permit. Electronic DMR submittal shall be complete on or before 11:59 PM of the 21st day of the month following the sampling period or as otherwise specified in this permit. A DMR shall be submitted for each required station even if no discharge occurred during the reporting period. Other reports required by this permit shall be postmarked by the date specified in the permit to: MPCA, Attn: WQ Submittals Center, 520 Lafayette Road North, St Paul Minnesota 551554194. [Minn. R. 7001..0150, Subp. 2(B), Minn. R. 7001..0150, Subp. 3(H)] |

| 5.12.109 | Incomplete or Incorrect Reports. The Permittee shall immediately submit an electronically amended report or DMR to the MPCA upon discovery by the Permittee or notification by the MPCA that it has submitted an incomplete or incorrect report or DMR. The amended report or DMR shall contain the missing or corrected data along with a cover letter explaining the circumstances of the incomplete or incorrect report. If it is impossible to electronically amend the report or DMR, the Permittee shall immediately notify the MPCA and the MPCA will provide direction for the amendment submittals. [Minn. R. 7001.0150, 3(G)] |

| 5.12.110 | Required Signatures. All DMRs, forms, reports, and other documents submitted to the MPCA shall be signed by the Permittee or the duly authorized representative of the Permittee. Minn. R. 7001.0150, subp. 2, item D. The person or persons that sign the DMRs, forms, reports or other documents shall certify that he or she understands and complies with the certification requirements of Minn. R. 7001.0070 and 7001.0540, including the penalties for submitting false information. Technical documents, such as design drawings and specifications and engineering studies required to be submitted as part of a permit application or by permit conditions, shall be certified by a registered professional engineer. [Minn. R. 7001.0540] |

| 5.12.111 | Detection Level. The Permittee shall report monitoring results below the reporting limit (RL) of a particular instrument as "<" the value of the RL. For example, if an instrument has a RL of 0.1 mg/L and a parameter is not detected at a value of 0.1 mg/L or greater, the concentration shall be reported as "<0.1 mg/L." "Non-detected," "undetected," "below detection limit," and "zero" are unacceptable reporting results, and are permit reporting violations. Where sample values are less than the level of detection and the permit requires reporting of an average, the Permittee shall calculate the average as follows: |
a. If one or more values are greater than the level of detection, substitute zero for all nondetectable values to use in the average calculation.
b. If all values are below the level of detection, report the averages as "<" the corresponding level of detection.
c. Where one or more sample values are less than the level of detection, and the permit requires reporting of a mass, usually expressed as kg/day, the Permittee shall substitute zero for all nondetectable values. [Minn. R. 7001.0150, 2(B)]

5.12.112 Records. The Permittee shall, when requested by the Agency, submit within a reasonable time the information and reports that are relevant to the control of pollution regarding the construction, modification, or operation of the facility covered by the permit or regarding the conduct of the activity covered by the permit. [Minn. R. 7001.0150, 3(H)]

5.12.113 Confidential Information. Except for data determined to be confidential according to Minn. Stat. ch. 116.075, subd. 2, all reports required by this permit shall be available for public inspection. Effluent data shall not be considered confidential. To request the Agency maintain data as confidential, the Permittee shall follow Minn. R. 7000.1300. [Minn. R. 7000.1300]

5.12.114 Noncompliance and Enforcement. [Minn. R. 7001]

5.12.115 Subject to Enforcement Action and Penalties. Noncompliance with a term or condition of this permit subjects the Permittee to penalties provided by federal and state law set forth in section 309 of the Clean Water Act; United States Code, title 33, section 1319, as amended; and in Minn. Stat. ch. 115.071 and 116.072, including monetary penalties, imprisonment, or both. [Minn. R. 7001.1090, 1(B)]

5.12.116 Criminal Activity. The Permittee may not knowingly make a false statement, representation, or certification in a record or other document submitted to the Agency. A person who falsifies a report or document submitted to the Agency, or tampers with, or knowingly renders inaccurate a monitoring device or method required to be maintained under this permit is subject to criminal and civil penalties provided by federal and state law. [Minn. R. 7001.0150, 3(G), Minn. R. 7001.1090, 1(G and H), Minn. Stat. ch. 609.671, 1]

5.12.117 Noncompliance Defense. It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. [Minn. R. 7001]

5.12.118 Effluent Violations. If sampling by the Permittee indicates a violation of any discharge limitation specified in this permit, the Permittee shall immediately make every effort to verify the violation by collecting additional samples, if appropriate, investigate the cause of the violation, and take action to prevent future violations. If the permittee discovers that noncompliance with a condition of the permit has occurred which could endanger human health, public drinking water supplies, or the environment, the Permittee shall within 24 hours of the discovery of the noncompliance, orally notify the commissioner and submit a written description of the noncompliance within 5 days of the discovery. The written description shall include items a. through e., as listed below. If the Permittee discovers other non-compliance that does not explicitly endanger human health, public drinking water supplies, or the environment, the non-compliance shall be reported during the next reporting period to the MPCA with its Discharge Monitoring Report (DMR). If no DMR is required within 30 days, the Permittee shall submit a written report within 30 days of the discovery of the noncompliance. This description shall include the following information:

a. a description of the event including volume, duration, monitoring results and receiving waters;
b. the cause of the event;
c. the steps taken to reduce, eliminate and prevent reoccurrence of the event;
d. the exact dates and times of the event; and
e. steps taken to reduce any adverse impact resulting from the event. [Minn. R. 7001.150, 3(K)]

5.12.119 Upset Defense. In the event of temporary noncompliance by the Permittee with an applicable effluent limitation resulting from an upset at the Permittee’s facility due to factors beyond the control of the Permittee, the Permittee has an affirmative defense to an enforcement action brought by the Agency as a result of the noncompliance if the Permittee demonstrates by a preponderance
of competent evidence:

a. the specific cause of the upset;
b. that the upset was unintentional;
c. that the upset resulted from factors beyond the reasonable control of the Permittee and did not result from operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventative maintenance, or increases in production which are beyond the design capability of the treatment facilities;
d. that at the time of the upset the facility was being properly operated;
e. that the Permittee properly notified the Commissioner of the upset in accordance with Minn. R. 7001.1090, subp. 1, item I; and
f. that the Permittee implemented the remedial measures required by Minn. R. 7001.0150, subp. 3, item J. [Minn. R. 7001.1090]

5.12.120 Release. [Minn. R. 7001]

5.12.121 Unauthorized Releases of Wastewater Prohibited. Except for discharges from outfalls specifically authorized by this permit, overflows, discharges, spills, or other releases of wastewater or materials to the environment, whether intentional or not, are prohibited. However, the MPCA will consider the Permittee's compliance with permit requirements, frequency of release, quantity, type, location, and other relevant factors when determining appropriate action. [Minn. Stat. ch. 115.061]

5.12.122 Discovery of a release. Upon discovery of a release, the Permittee shall:

a. Take all reasonable steps to immediately end the release.
b. Notify the Minnesota Department of Public Safety Duty Officer at 1(800)422-0798 or (651)649-5451 (metro area) immediately upon discovery of the release. You may contact the MPCA during business hours at 1(800)657-3864 or (651)296-6300 (metro area).
c. Recover as rapidly and as thoroughly as possible all substances and materials released or immediately take other action as may be reasonably possible to minimize or abate pollution to waters of the state or potential impacts to human health caused thereby. If the released materials or substances cannot be immediately or completely recovered, the Permittee shall contact the MPCA. If directed by the MPCA, the Permittee shall consult with other local, state or federal agencies (such as the Minnesota Department of Natural Resources and/or the Wetland Conservation Act authority) for implementation of additional clean-up or remediation activities in wetland or other sensitive areas. [Minn. R. 7001.1090]

5.12.123 Sampling of a release. Upon discovery of a release, the Permittee shall:

a. Collect representative samples of the release. The Permittee shall sample the release for parameters of concern immediately following discovery of the release. The Permittee may contact the MPCA during business hours to discuss the sampling parameters and protocol. In addition, Fecal Coliform Bacteria samples shall be collected where it is determined by the Permittee that the release contains or may contain sewage. If the release cannot be immediately stopped, the Permittee shall consult with MPCA regarding additional sampling requirements. Samples shall be collected at least, but not limited to, two times per week for as long as the release continues.
b. Submit the sampling results on the Release Sampling Form (http://www.pca.state.mn.us/index.php/view-document.html?gid=18867). The Release Sampling Form shall be submitted to the MPCA with the next DMR or within 30 days whichever is sooner. [Minn. R. 7001.1090]

5.12.124 Bypass. [Minn. R. 7001]

5.12.125 Anticipated bypass. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if the bypass is for essential maintenance to assure efficient operation of the facility. The permittee shall submit prior notice, if possible at least ten days before the date of the bypass to the MPCA.

The notice of the need for an anticipated bypass shall include the following information:
| 5.12.126 | All other bypasses are prohibited. The MPCA may take enforcement action against the Permittee for a bypass, unless the specific conditions described in Minn. R. Ch. 7001.1090 subp. 1, K and 122.41(m)(4)(i) are met.

In the event of an unanticipated bypass, the permittee shall:

a. Take all reasonable steps to immediately end the bypass.

b. Notify the Minnesota Department of Public Safety Duty Officer at 1(800)422-0798 or (651)649-5451 (metro area) immediately upon commencement of the bypass. You may contact the MPCA during business hours at 1(800)657-3864 or (651)296-6300 (metro area).

c. Immediately take action as may be reasonably possible to minimize or abate pollution to waters of the state or potential impacts to human health caused thereby. If directed by the MPCA, the Permittee shall consult with other local, state or federal agencies for implementation of abatement, clean-up, or remediation activities.

d. Only allow bypass wastewater as specified in this section to enter waters of the state from outfalls specifically authorized by this permit. Samples shall be collected at the frequency and location identified in this permit or two times per week for as long as the bypass continues, whichever is more frequent. [40 CFR 122.41(m)(4)(i), Minn. R. 7001.1090, 1(K), Minn. Stat. ch. 115.061] |
required by statute or rule until the agency has issued a written permit for the facility or activity.

Permittees that propose to make a change to the facility or discharge that requires a permit modification shall follow Minn. R. 7001.0190. If the Permittee cannot determine whether a permit modification is needed, the Permittee shall contact the MPCA prior to any action. It is recommended that the application for permit modification be submitted to the MPCA at least 180 days prior to the planned change. [Minn. R. 7001.0030]

5.12.135 Plans, specifications and MPCA approval are not necessary when maintenance dictates the need for installation of new equipment, provided the equipment is the same design size and has the same design intent. For instance, a broken pipe, lift station pump, aerator, or blower can be replaced with the same design-sized equipment without MPCA approval.

If the proposed construction is not expressly authorized by this permit, it may require a permit modification. If the construction project requires an Environmental Assessment Worksheet under Minn. R. 4410, no construction shall begin until a negative declaration is issued and all approvals are received or implemented. [Minn. R. 7001.0030]

5.12.136 Report Changes. The Permittee shall give advance notice as soon as possible to the MPCA of any substantial changes in operational procedures, activities that may alter the nature or frequency of the discharge, and/or material factors that may affect compliance with the conditions of this permit. [Minn. R. 7001.0150, 3(M)]

5.12.137 Chemical Additives. The Permittee shall receive prior written approval from the MPCA before increasing the use of a chemical additive authorized by this permit, or using a chemical additive not authorized by this permit, in quantities or concentrations that have the potential to change the characteristics, nature and/or quality of the discharge.

The Permittee shall request approval for an increased or new use of a chemical additive at least 60 days, or as soon as possible, before the proposed increased or new use. This written request shall include at least the following information for the proposed additive:

a. The process for which the additive will be used;
b. Safety Data Sheet (SDS) which shall include aquatic toxicity, human health, and environmental fate information for the proposed additive. The aquatic toxicity information shall include at minimum the results of: a) a 48-hour LC50 or EC50 acute study for a North American freshwater planktonic crustacean (either Ceriodaphnia or Daphnia sp.) and b) a 96-hour LC50 acute study for rainbow trout, bluegill or fathead minnow or another North American freshwater aquatic species other than a planktonic crustacean;
c. a complete product use and instruction label;
d. the commercial and chemical names and Chemical Abstract Survey (CAS) number for all ingredients in the additive (If the MSDS does not include information on chemical composition, including percentages for each ingredient totaling to 100%, the Permittee shall contact the supplier to have this information provided); and

5.12.138 MPCA Initiated Permit Modification, Suspension, or Revocation. The MPCA may modify or revoke and reissue this permit pursuant to Minn. R. 7001.0170. The MPCA may revoke without reissuance this permit pursuant to Minn. R. 7001.0180. [Minn. R. 7001.0170, Minn. R. 7001.0180]
TMDL Impacts. Facilities that discharge to an impaired surface water, watershed or drainage basin may be required to comply with additional permits or permit requirements, including additional restriction or relaxation of limits and monitoring as authorized by the CWA 303(d)(4)(A) and 40 CFR 122.44.I.2.i., necessary to ensure consistency with the assumptions and requirements of any applicable US EPA approved wasteload allocations resulting from Total Maximum Daily Load (TMDL) studies. [Minn. R. 7001]

Permit Transfer. The permit is not transferable to any person without the express written approval of the Agency after compliance with the requirements of Minn. R. 7001.0190. A person to whom the permit has been transferred shall comply with the conditions of the permit. [Minn. R. 7001.0150, 3(N)]

Facility Closure. The Permittee is responsible for closure and post-closure care of the facility. The Permittee shall notify the MPCA of a significant reduction or cessation of the activities described in this permit at least 180 days before the reduction or cessation. The MPCA may require the Permittee to provide to the MPCA a facility Closure Plan for approval.

Facility closure that could result in a potential long-term water quality concern, such as the ongoing discharge of wastewater to surface or ground water, may require a permit modification or reissuance.

The MPCA may require the Permittee to establish and maintain financial assurance to ensure performance of certain obligations under this permit, including closure, post-closure care and remedial action at the facility. If financial assurance is required, the amount and type of financial assurance, and proposed modifications to previously MPCA-approved financial assurance, shall be approved by the MPCA. [Minn. Stat. ch. 116.07, 4]

Permit Reissuance. If the Permittee desires to continue permit coverage beyond the date of permit expiration, the Permittee shall submit an application for permit reissuance: Due by 180 days prior to permit expiration. If the Permittee does not intend to continue the activities authorized by this permit after the expiration date of this permit, the Permittee shall notify the MPCA in writing at least 180 days before permit expiration.

If the Permittee has submitted a timely application for permit reissuance, the Permittee may continue to conduct the activities authorized by this permit, in compliance with the requirements of this permit, until the MPCA takes final action on the application, unless the MPCA determines any of the following (Minn. R. 7001.0040 and 7001.0160):

a. The Permittee is not in substantial compliance with the requirements of this permit, or with a stipulation agreement or compliance schedule designed to bring the Permittee into compliance with this permit;

b. The MPCA, as a result of an action or failure to act by the Permittee, has been unable to take final action on the application on or before the expiration date of the permit;

c. The Permittee has submitted an application with major deficiencies or has failed to properly supplement the application in a timely manner after being informed of deficiencies. [Minn. R. 7001.0160]

<td>Permit Reissuance. If the Permittee desires to continue permit coverage beyond the date of permit expiration, the Permittee shall submit an application for permit reissuance: Due by 180 days prior to permit expiration. If the Permittee does not intend to continue the activities authorized by this permit after the expiration date of this permit, the Permittee shall notify the MPCA in writing at least 180 days before permit expiration. If the Permittee has submitted a timely application for permit reissuance, the Permittee may continue to conduct the activities authorized by this permit, in compliance with the requirements of this permit, until the MPCA takes final action on the application, unless the MPCA determines any of the following (Minn. R. 7001.0040 and 7001.0160):</td>
</tr>
<tr>
<td></td>
<td>a. The Permittee is not in substantial compliance with the requirements of this permit, or with a stipulation agreement or compliance schedule designed to bring the Permittee into compliance with this permit;</td>
</tr>
<tr>
<td></td>
<td>b. The MPCA, as a result of an action or failure to act by the Permittee, has been unable to take final action on the application on or before the expiration date of the permit;</td>
</tr>
<tr>
<td></td>
<td>c. The Permittee has submitted an application with major deficiencies or has failed to properly supplement the application in a timely manner after being informed of deficiencies. [Minn. R. 7001.0160]</td>

1. Calculate as flow-weighted sum of total annual mass Kjeldahl nitrogen and nitrate-plus-nitrite applied to site, divided by the acreage of the site. Limit applies to the sum of all sources of nitrogen applied to the site.
2. Sample before irrigation or application of commercial or other supplemental fertilizer. The composite shall consist of a mixture of 15-20 subsamples taken from a 0 to 8 inch core. At least one composite sample shall be collected for each 40 acres.
