

**Summary of comments by Minnesota Representative Brita Sailer (attending August 25, 2008, CDIL Work Group meeting as an observer) on background of Work Group's statutory charge:**

- Don't put demolition landfill operators in untenable positions with uneconomic requirements;
- Yes, we do need ground water protection and fully monitored ground water, and need effective inspection up front at demolition sites;
- We also want a level playing field so competitors don't take advantage of the good actors - don't want to penalize those doing things correctly; and
- Don't set us up for illegal dumping because are so few landfills left.
