

Staff in the Environmental Analysis and Outcomes Division monitor and evaluate the physical, chemical and biological conditions of Minnesota’s environment. This information is used to:

- identify environmental threats and impacts to human and ecosystem health
- lead strategic planning for the agency
- help set environmental goals and measure progress in achieving them
- establish standards
- conduct risk assessments and effluent limits in support of regulatory programs
- make data accessible to agency leadership, staff, stakeholders and citizens

Examples of programs and activities conducted in the division include:

- [Air Emissions Risk Analysis](#)
- [Biological Monitoring](#)
- [Citizen Water Monitoring](#)
- [Environmental Data Access](#)
- [Environmental Information Report](#)
