

**DON'T TREAT  
THIS LIKE  
GARBAGE.**

**DISPOSE OF HOUSEHOLD  
MERCURY PROPERLY.**

## MAKE PROPER DISPOSAL A PRIORITY

When mercury-containing items get thrown in the trash, the mercury may not stay in the landfill. Mercury can contaminate our land, lakes and rivers and the fish we eat.

Make proper disposal of mercury switches, thermostats and CFL bulbs part of your plan. It's the right thing to do, and it's the law.
