

Companies with American Petroleum Institute Standard 653 Inspectors

Tanks/Aboveground Storage Tanks

This is a list of companies with inspectors certified to perform American Petroleum Institute (API) Standard 653 inspections of field-erected aboveground storage tanks (ASTs). The Minnesota Pollution Control Agency (MPCA) maintains this list solely as a service to AST owners and operators who may be required by rule or permit to inspect certain ASTs. This information is voluntarily supplied by the companies listed and is not necessarily a complete list of available services. Other firms offering similar services may not appear on this list because the MPCA is unaware of their activities. A company may be added to this list when requested.

The MPCA does not endorse specific companies. The MPCA, by providing the list, does not imply that these companies are or are not providing services in compliance with applicable laws. The MPCA cautions AST owners and operators to personally evaluate the services of any company they use to inspect their ASTs. Users of this list should also make sure that any company with whom they conduct business complies with all local, state, and federal requirements. This list is alphabetical and will be periodically updated by the MPCA.
