

Very Small Quantity Generator Collection Programs

Instructions and list of available hazardous waste collection programs

Very small quantity generators of hazardous waste

Businesses that generate 100 kilograms (kg) (220 pounds or about 22 gallons) or less of hazardous waste per month are known as Very Small Quantity Generators (VSQGs). VSQGs have a hazardous waste disposal option available to them in addition to those allowed for all generators, called VSQG Collection Programs.

VSQG Collection Programs are sites authorized by the Minnesota Pollution Control Agency (MPCA) or other states to accept and consolidate hazardous waste from VSQGs before shipping it for proper disposal. While most VSQG Collection Programs charge a disposal fee, they are commonly less expensive than hiring a disposal vendor to pick up hazardous waste at your site.

How to use a VSQG Collection Program to dispose of your hazardous waste

1. Verify your business site is a VSQG. Business sites that generate more than 100 kg of hazardous waste in a month are not VSQGs and may not use VSQG Collection Programs. VSQGs may, however, accumulate up to 1000 kg over many months and dispose of it all at one time and still remain VSQGs and eligible to use VSQG Collection Programs. For more information about generator size, see MPCA fact sheet #w-hw1-02, Determine Generator Size, at <https://www.pca.state.mn.us/sites/default/files/w-hw1-02.pdf>.
2. Obtain or verify your site's hazardous waste identification number (HWID). You may not take your hazardous waste to any VSQG Collection Program unless your site has a valid HWID.
 - If your site does not have an HWID, you must use the MPCA's e-Services Notification of Regulated Waste Activity to obtain one. Instructions for the e-Services Notification are available in MPCA fact sheet #w-hw5-12 at <https://www.pca.state.mn.us/sites/default/files/w-hw5-12.pdf>.
 - If you believe your site already has an HWID, verify that it is valid for your business using the MPCA's Search the Hazardous Waste Identification Number database tool at <https://www.pca.state.mn.us/waste/hazardous-waste-identification-number-search>.
3. Choose a VSQG Collection Program from the [program list](#) on page 3.
4. Contact and get preapproval from the program you have selected. Most programs will not accept waste without preapproval and an appointment for each shipment. Verify that they will accept the type and volume of hazardous waste you have. Not all programs accept all wastes. In addition, some programs have per-visit or annual volume limits.
5. Package your hazardous waste to meet the standards of the U.S. Department of Transportation's Hazardous Materials Regulations (HMR) and your chosen VSQG Collection Program. Find detailed guidance on the HMR requirements in MPCA fact sheet #w-hw2-53, Requirements for Transporting Waste to a Very Small Quantity Generator Collection Program, at <https://www.pca.state.mn.us/sites/default/files/w-hw2-53.pdf>. Many programs can provide you packaging guidance, or may have their own packaging requirements.
6. Transport only your own hazardous waste in your business's vehicle. Some government-operated VSQG Collection Programs may also offer waste pick-up service. Do not transport another business's waste.
7. Keep the receipt received by the VSQG Collection Program for at least three years.

What wastes do most VSQG Collection Programs accept?

Most VSQG Collection Programs can accept many common business hazardous wastes, including solvents, cleaners, wastes containing heavy metals, and universal wastes.

Universal wastes in Minnesota include fluorescent and high intensity discharge (HID) lamps; lead-acid, nickel-cadmium (NiCad), and lithium batteries; mercury-containing devices such as thermostats and thermometers; aerosols and compressed gas cylinders; and pesticides accepted by the Minnesota Department of Agriculture's Waste Pesticide Collection Program. For more information, see MPCA fact sheet #w-hw4-62, Managing Universal Wastes, at <https://www.pca.state.mn.us/sites/default/files/w-hw4-62.pdf>.

What wastes do VSQG Collection Programs reject?

Most VSQG Collection Programs reject asbestos, explosives, infectious waste (sharps), radioactive, or unknown wastes. Only some programs will accept electronics or used oil.

- **Asbestos.** Contact your county solid waste officer or MPCA solid waste staff for assistance in identifying and properly disposing of asbestos wastes. For more information, see MPCA webpage Asbestos in demolition or renovations, at <https://www.pca.state.mn.us/waste/asbestos-demolition-or-renovations>.
- **Electronics.** Electronics that will be recycled may be transported without a manifest to a collection or recycling site. See MPCA fact sheet #w-hw4-15, Managing Electronic Wastes, at <https://www.pca.state.mn.us/sites/default/files/w-hw4-15.pdf>.
- **Explosives.** Contact your local law enforcement agency or fire department for assistance in handling and properly disposing of any suspected explosive wastes.
- **Infectious waste (sharps).** You may transport your infectious waste to any Certified Infectious Waste Facility or hire a Registered Infectious Waste Transporter to pick it up from your site. See MPCA fact sheet #w-sw4-34, Infectious Waste: Approved waste management vendors and systems in Minnesota, at <https://www.pca.state.mn.us/sites/default/files/w-sw4-34.pdf>.
- **Radioactive wastes.** Contact the Radiation Control Section at the Minnesota Department of Health (MDH) for assistance in identifying and properly disposing of potentially radioactive wastes.
- **Used oil.** You may transport up to 55 gallons of used oil to any other business as long as the receiving business will not burn the used oil without testing it first. You may also ship your used oil with a used oil transporter. See MPCA fact sheet #w-hw4-30, Used Oil and Related Wastes, at <https://www.pca.state.mn.us/sites/default/files/w-hw4-30.pdf>.

More information

Guidance and requirements in this fact sheet were compiled from Minnesota Rules, Chapter 7045, and incorporate regulatory interpretation decisions made by the MPCA on December 1, 2014.

For general information on hazardous waste identification and management, see MPCA fact sheet #w-hw1-00, Summary of Hazardous Waste Requirements, at <https://www.pca.state.mn.us/sites/default/files/w-hw1-00.pdf>.

The MPCA's Small Business Environmental Assistance Program (SBEAP) offers free, confidential regulatory compliance assistance. The Minnesota Technical Assistance Program (MnTAP) can help reduce your waste.

Available VSQG Collection Programs

In addition to the programs listed below, a VSQG may also transport their hazardous waste to a VSQG Collection Program in a surrounding state as long as that program: has been authorized by that state to receive out-of-state waste, has agreed to accept the waste, will manage the waste as a fully regulated hazardous waste, and provides the VSQG generator with a receipt.

Always contact a program first to ensure it can accept the type and volume of waste you have.

Location Operator	Contact	Counties served
Bagley Northwest MN HHW Management	Randy Bodensteiner 218-694-2090 rhb@gvtel.com	Beltrami, Cass, Clearwater, Kittson, Lake of the Woods, Marshall, Pennington, Polk, Red Lake, Roseau
