

ADDITIONS TO APPENDIX B OF THE MINNESOTA RIVER BASIN GENERAL PHOSPHORUS PERMIT MNG420000 (PERMIT)– PHASE I

The following is the list of current permittees that applied for and received coverage under Appendix B of the Permit after the date of Permit issuance (i.e. December 1, 2005). Please see the Minnesota River Basin General Phosphorus Permit – Phase I: FINAL for a list of the facilities originally covered by the Permit. This list was last updated on September 9, 2020.

Appendix B, Part 2 (Current Permittees that obtained coverage after Permit issuance) These WWTFs did not exist as of the date of approval of the TMDL. These Permittees must use a trade ratio of 1.2 to 1. Any mass of phosphorus discharged from May-September by a facility listed in Appendix B – Part 2 shall be offset through trading as authorized by this permit so that there is no net increase in phosphorus discharged to the Minnesota River basin as a result of the Permittee’s discharge.

No.	Permittee Name	Minnesota River Basin Permit Number	Individual NPDES Permit Number	Monitoring Frequency (samples per week) ¹	Jordan BOD Factor	Phosphorus Limit May-September (lbs)
1.	POET Biorefining-Lake Crystal	MNG420040	MN0067172	2	0.72	0
2.	Granite Falls Energy LLC	MNG420041	MN0066800	2	0.1	0
3.	Green Plains Fairmont, LLC	MNG420042	MN0068063	2	0.22	0
4.	Highwater Ethanol LLC	MNG420044	MN0068586	2	0.2	0
5.	Lower Sioux Indian Res.	MNG420045	MN0061433	2	0.27	0

¹The influent and effluent monitoring frequency listed is applicable May through September. From October through April, the monitoring frequency is twice monthly.
